Azure Migration Assessment

[www.eastbay.ca](http://www.eastbay.ca)

In today's I.T. Infrastructure, growing demand is causing a stress on available capacity. By using Eastbay's migration assessment offer, the client will get an in depth look at the resources it will cost to migrate their infrastructure to Microsoft Azure.

## CHALLENGES

A few of the challenges clients have are, nearing end of life for infrastructure and, available capacity along with having trouble keeping up with the growing demand.

## IDEAL SOLUTION

By using Eastbay's Migration Assessment offer, the client is able see an effective mapping of costs of running their infrastructure in Azure.

## DESIRED OUTCOMES

This will allow the client visibility and a more detailed plan for an Azure migration which will create a refreshed infrastructure with scalable capacity and security.

# Eastbay Cloud Services

## Azure Migration Assessment

Determining all your costs associated with migrating to Azure in a clear and concise way.

### Clear Cost

Clear and concise layout of all costs associated with migrating to Azure.

### In Depth Report

The assessment provides an in-depth report that shows what it would take to migrate to Azure and the usage while in Azure.

### Quick Migration When Ready

The assessment allows for an easy transition into migrating to Azure.

# Customer success: Chair-man Mills Corp Azure Migration Assessment

*“Eastbay’s Azure Migration Assessment helped us assess the strategic and financial decisions for migrating to the cloud in Azure. From start to finish the entire project was smooth, efficient and deliverables were achieved. Eastbay’s communication & project management kept us well informed of project milestones as compared with the Migration Assessment. We wouldn’t hesitate to recommend Eastbay Cloud Services Inc.”* Chris Doyle – CFO - Chair-man Mills

## Estimated Cost of Infrastructure in Azure

The migration assessment allowed visibility into the environment running costs in Azure to project optimal usage and needs. This gave Chair-man Mills the ability to forecast future costs.

## Determined Migration Readiness

Once the migration assessment had completed Chair-man Mills was able to see the readiness of their infrastructure by identifying potential roadblocks and issues that could be corrected before the migration took place.

## Optimized environment

By using the Migration Assessment program Chair-man Mills was able to optimize their environment by cutting down on redundant servers. This cut overall costs for infrastructure once migrated.

# Eastbay's Azure Migration Assessment. The most informative way to migrate to Azure.
