

# Azure Virtual Desktop (AVD) with Eastwall

Azure Virtual Desktop is a desktop & application virtualization service that runs as a platform-as-a-service offering on Azure. **Eastwall** supports requirements gathering, architecture & design of your tailored implementation. AVD supports secure, scalable deployments of business applications with reduced operational overhead and cost integrated with existing M365 & Azure subscriptions.

## Candidates for AVD include:

- Applications bound by security requirements (PHI/PII) and regulation/compliance.
- Elastic workforce needs, such as remote work, mergers and acquisitions, short-term employees, contractors, and partner access.
- Specific employees and locations, such as bring your own device (BYOD) and mobile users, clinical centers, and branch workers.
- Specialized workloads, such as design and engineering, marketing or sales access, legacy apps, and software development testing.

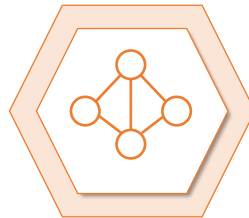

## Why Eastwall?

- Industry best-practices using **Microsoft’s proven** Cloud Adoption Framework (CAF)
- Personalized full-service offering with **end-to-end** cloud planning, design, implementation & operations support.
- Technology deliver team with **decades of cumulative Azure experience** that support enabling your workforce and end-users with modern application delivery systems.

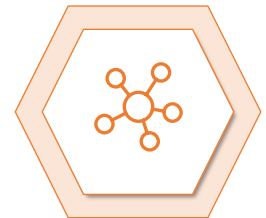

*Tailored user experience for your organization on core line of business applications & tools*

Partner with Eastwall to procure Azure & deploy a VDI landing zone or integrate with your existing cloud subscription(s) and application(s).

Work with existing identity, users, groups, policies, and controls to manage your AVD environment securely and with confidence.

Enable your VDI ecosystem with desktop and interconnected applications to enable your users for maximum productivity.
