

# DMARC Made Easy

EasyDMARC is your one-stop solution for all things DMARC to solve email security, authentication, and deliverability issues in just a few clicks.

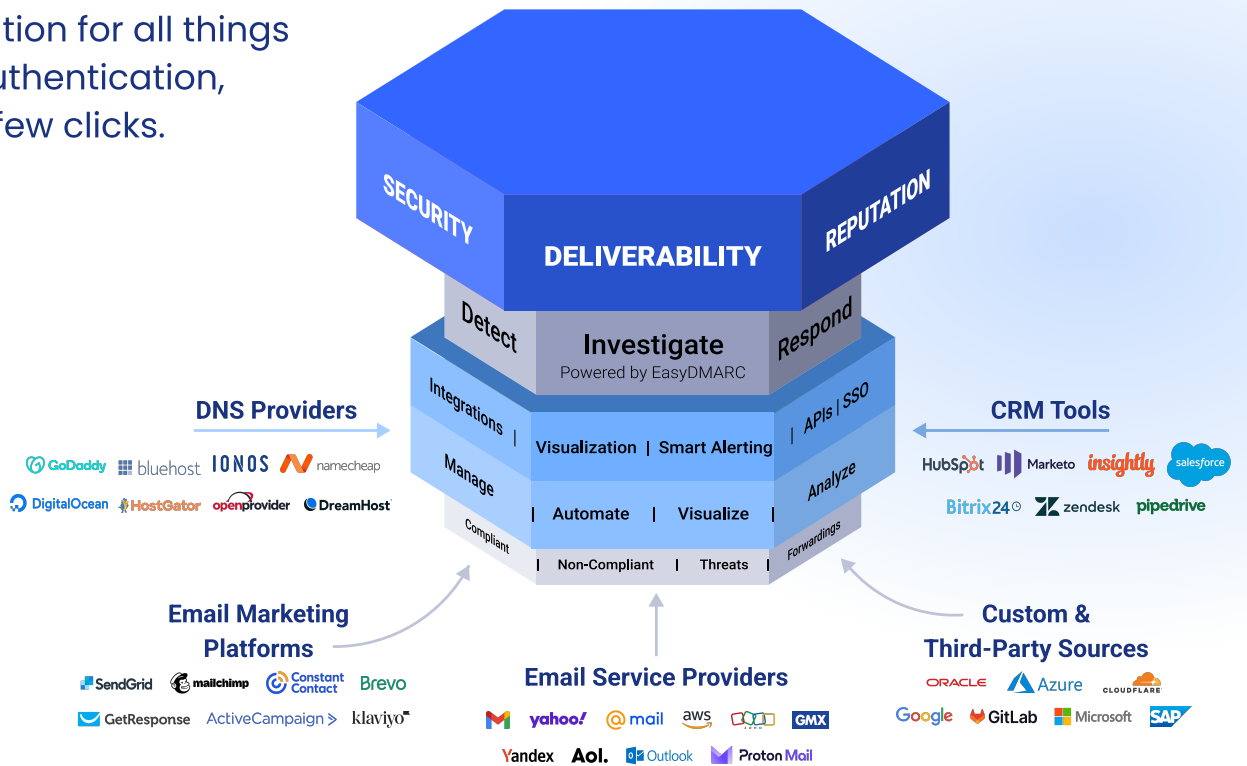

## What is DMARC?

DMARC is a powerful email authentication tool that helps prevent email spoofing. Spoofing is when a cybercriminal disguises their email address to appear as someone else (like your company). DMARC protects your domain name by authenticating all emails sent from your address.

## Why EasyDMARC?

- ✔ **Simple Setup**  
 EasyDMARC gets you up and running with DMARC in minutes. No technical expertise required.
- ✔ **Automated Management**  
 Our managed solutions take care of managing your DMARC records, saving you time and effort.
- ✔ **Real-time Insights**  
 Gain valuable insights into email traffic with detailed reports on email authentication and potential threats.
- ✔ **Improved Deliverability**  
 With EasyDMARC, your legitimate emails reach recipients' inboxes and have the best-ever deliverability.

**57 days shorter time to reach "p=reject"**

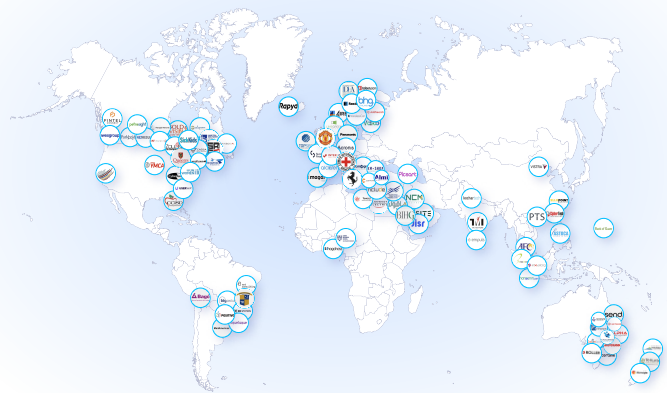

“EasyDMARC provided good hands-on help through the trials, through the onboarding process, through the whole thing. Thanks to our cooperation, Newman University currently has a complete comprehensive product combination of security, deliverability, and reporting.”

Icer Vaughan | CIO, Newman University
