

Project Operations Discovery Services

Solution Overview:

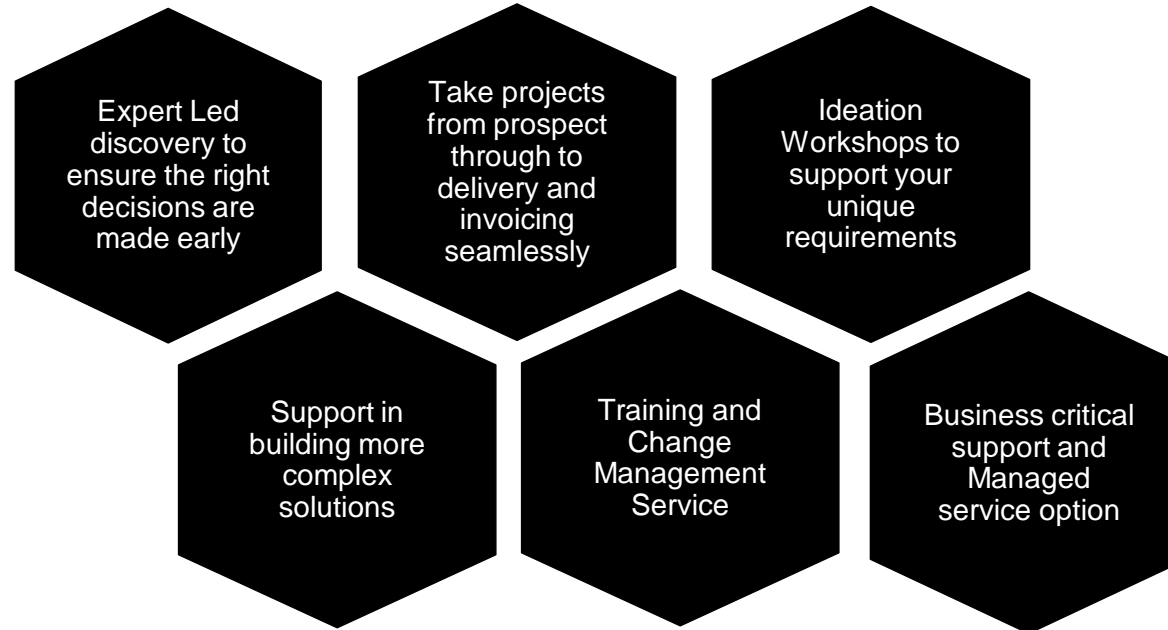

An experienced member of the DXC team will discuss your business and requirements to assess how Project Operations could help you deliver projects end-to-end seamlessly.

Solution features:

Help your business decide how best to take advantage of Microsoft Dynamics Project Operations - Project Operations comes in multiple flavours and it can be difficult to know which route to take.

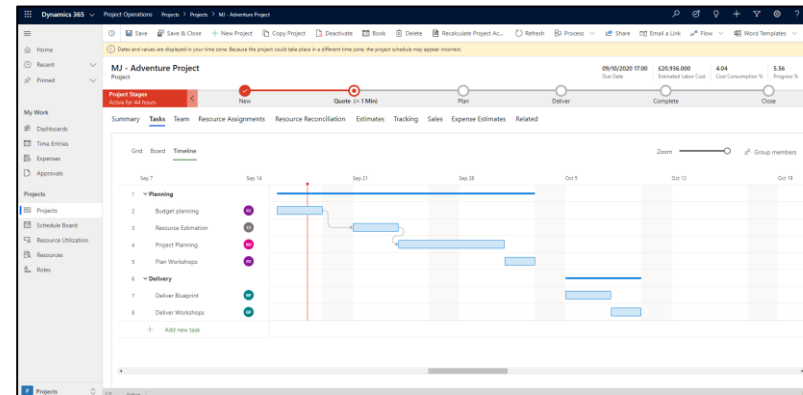

Years of experience and close ties to the Microsoft Product Team - DXC know what is there already and what is coming soon.

Built on D365 and the Power Platform – Can be easily extended using Power Apps, Power BI, Power Automate

Implementation:

- 1hr discovery session.
- Summary report.
- Remote delivery.
