# DXC Robotic Process Automation

Solution Overview:

Our Robotic Process Automation (RPA) service provides cost-effective automation to manual, repetitive tasks - across cloud and legacy applications.

Solution features:

- Packaged set of services aimed at delivering automated business processes, ranging from repetitive data entry to low volume data integration

- Reduce the need for manual data entry, giving your workforce time back to Invest in more important business functions

- UI Flow pipelines inside of Microsoft Power Automate and the Power Platform

- Security and governance across SaaS (web) and legacy (on-premises) systems

- Implement RPA for the following scenarios:
  - **Robotic Worker** - Training the robot just like training a person
  - **Low Volume Integration** - Automatically rekey information across multiple systems
  - **Automated Testing** - Simulate expected actions in a piece of software

Benefits:

- Rapid Return-on-Investment
- Reduce human error across your systems
- Improve accuracy with 0% error rate
- Automatically reconcile data across multiple data sources
- Improve decision making with more consistent business data
- Utilise your team in the most efficient way possible

Implementation:

Packages from 3 days @£3k* to a completely boutique implementation

RPA-in-a-Day Training:

Corporate rate £2k

Basic	Complete	Enhanced	Boutique
3 Day Implementation	**10-15 Day Implementation**	**30 Day Implementation**	**Fully tailored Implementation**
• Analysis of one simple process	• All of 3 Day Activities	• All of 10-15 Day Activities	• All of 30 Day Activities
• UI Flow development for the one process	• Multi-system and multi-screen processes	• More complex RPA needs	• Complex business process requirements

		• Additional governance and security	
		• Detailed handover and process flow documentation	

What we deliver/USP

Collaboration

- Partnership with DXC working on a collaborative solution
- Ideation workshops to get started with your first deliverable

Power Automate

- Expertise in Power Automate and UI Flows, with a specific focus on RPA

PowerOps

- Power Platform Consultants to train your business on best practices
- DevOps and Governance guidance for your RPA processes

Expertise

- Proven experience with business applications and automation
- Specialist expertise with D365
- Experience delivering RPA and UI Flows
