Solution Components

End User App

What we deliver?

- Global, Regional and Site Admin
- Model and map a workplace – country, city, building, floor, room, seat
- Floorplan visualisation via image and grid system
- Management of environments – define available spaces
- Manager approval on bookings
- Reporting

Business Drivers

Health & Safety

- Provide a safe working environment for my employees
- Ensure those returning to a workspace can do so in a simple way

Management Approval

- Are my team looking to go back in to a company building?
- How often are my team visiting site?

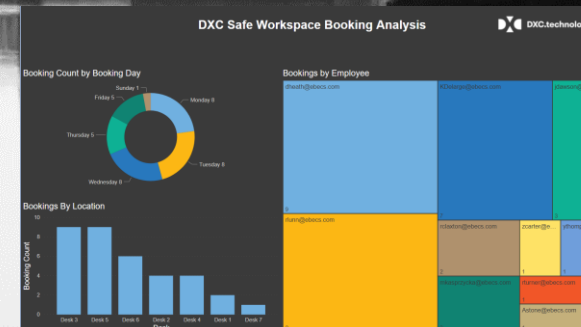

Workspace Management

- Are workers in the appropriate area?
- Are workers moving in to areas which they may not be authorised?
- What parking is available

Auditability

- Who visited sites at what time
- Who may have interacted with one another
- How is my site being used
- Do desks need deep cleaning

Administrator User

What does it cost?

Rapid Implementation:

£2k* remote delivery

*Assumes Software Dependencies are in place and a max. of 50 users
