DXC Microsoft Business Applications

Build impactful solutions to drive business value

The goal is to drive additional value for our customers

Digital Disruption

Encourage innovation and disruption within our business / industry without disrupting operations

Lay the foundations

How do we make sure that we have the correct foundations for our organisation to build upon

Citizen Developers

How do we give citizen developers and users the skills and best practices needed to empower them to innovate

Time to Learn

Taking time out of a busy BAU schedule can be difficult; suitable training facilities and environments are not always readily available

Power Platform Enablement

Encourage innovation and provide business value

- Enable Power Platform capabilities within your organization
- Empower all developers and users
- Accelerate time to value: start building impactful solutions within a week
- Drive towards a common goal, bringing IT, Developers and Business users together to learn
- Learn about complementary DXC offerings e.g. PowerOps

Timeframe

- 1 week training course

Cost

- £5,000 (or £4,000 virtual 4-day)

What's included?

- 1** Introduction to the Power Platform, Common Data Service and Power Platform Data Connectors
- 2** Training in and creation of a Power BI report from scratch to analyse and unlock insight
- 3** Creation of two different Power Apps (Canvas and Model) and Power Automation Flows to automate business processes
- 4** Complete an end-to-end solution build expanding attendees' skills

Why run the Power Platform enablement program?

Lead your business to innovation

Empower all developers and users, driving towards a common goal

Learn from experience

With some of the largest Power Platform projects globally, we help you learn from our experience

Accelerate time to value

Start building impactful solutions within the week and realize the value of your investment sooner

ENVIRONMENT

RESPONSIBILITY

Customer Story

Genus is a world-leading animal genetics company. Through the development of better bovine and porcine breeding livestock, Genus helps farmers to produce better quality meat and milk more efficiently and sustainably.

Challenge

- Difficulty onboarding new employees in to the business
- Complex back end systems, not suitable for LOB staff
- Allowing drivers to complete paperwork and managers to see loads performance in real time
- Inability to exploit new technologies to better serve customers and staff.

Solution

- Dynamics 365 across multiple countries and time-zones, spanning financial, operational and sales work-streams
- Development of Microsoft PowerApps (and PowerApps mobile app) for niche, field-based applications
- Use of MS Power Platform for Talent onboarding and insights
- No Dynamics licenses needed for operations staff, saving costs

Benefits

- A modern platform to manage transport of livestock worldwide, aid company growth and better serve Genus's customers.
- A real competitive-edge in securing new business and further investment
- Accurate and predictive business insight for better decisions and planning

Grafton Group plc

Customer Story

Grafton Group plc is an international distributor of building materials to trade customers who are primarily engaged in residential repair, maintenance and improvement projects and house building.

Challenge

- Grafton Group required a robust and fool proof way to request financial transactions (specifically currency exchange) between their users Business units

Solution

- Users can only make a request value date, on a day that isn't a weekend or a bank holiday
- Built a dynamic HTML form within the app which Grafton wanted to populate with
- Sharepoint datasource was used as the Central Hub
- Robust auditable solution

Benefits

- Single platform
- A consolidated view of all interactions with partners, employees, customers and suppliers
- Business decisions based on knowledge rather than conjecture
- Flexible working time provided through bespoke Power Platform application

Case Story

Transport for the North (TfN) is England's first sub-national transport body. It was formed to transform the transport system across the north of England, providing the infrastructure needed to drive economic growth.

Challenge

- Central government mandated that TfN became a Statutory Transport Body within a matter of months
- Creation of a new solution to meet the needs of a progressive organisation

Solution

- 20 x Microsoft Dynamics 365 Unified Operations Licences (including D365 for Talent); 90 x Team licences; 3 x Extra environments
- The application is tightly integrated in to core backend systems via the use of Microsoft Flow and LogicApps.
- The finished PowerApp was embedded within the core HR solution so appears as a seamless part of that platform

Benefits

- Single platform
- A consolidated view of all interactions with partners, employees, customers and suppliers
- Business decisions based on knowledge rather than conjecture
- Flexible working time provided through bespoke Power Platform application

eBECS Case Study – National Trust

The National Trust conducts a large number of surveys amongst their staff, members and visitors of their properties to monitor their performance as a charity, on different levels.

The insights gained by using the PowerApps solution goes to the heart of what we're trying to achieve at National Trust. PowerApps is simple to use, and integrates well with our existing Microsoft investments, making it very cost-effective.

Jon Townsend: Technology and Information Security Director, National Trust.

Challenge

- Surveys conducted manually and paper-based;
- Time and cost consuming process to conduct survey, assemble and analyse results
- Incomplete survey results
- Dependant on volunteers to conduct and analyse survey
- Reach of survey limited

Solution

- Mobile data collection app that uploads data directly to corporate systems
- Apps built in Microsoft power apps
- No in house expertise needed with subscription service
- Ongoing support to create new apps or adapt existing apps
- Ability to Integrate data into processes from a variety of business systems, the web, sensors and social media

Benefits

- Reduction of costs and time
- More accurate information
- Improvement of survey response rate
- Survey can be conducted online and via volunteers – increasing reach
- Survey results fed straight into system, eliminating manual processes

National Trust

To protect their collection of Historic Buildings against damage from vermin, the National Trust monitors the presence of insects in their buildings via the placement of pest traps, which are then analysed every 3 months to identify possibly pests.

Challenge

- Data collection from Pest Management time consuming manual process
- Data analysis limited
- Long lead up time to undertake action against infestation

Solution

- eBECS Custom designed an app to collect Pest Management Data
- App ready within approx. 5 weeks
- Includes Workshop, POC, Build, Deployment and Training
- Leveraging and integrating: Microsoft PowerApps, Microsoft Power BI, Microsoft Flow, Microsoft Dynamics 365, Microsoft Office 365 & SharePoint, Line of business systems, Common Data Services, Connectors & Gateways

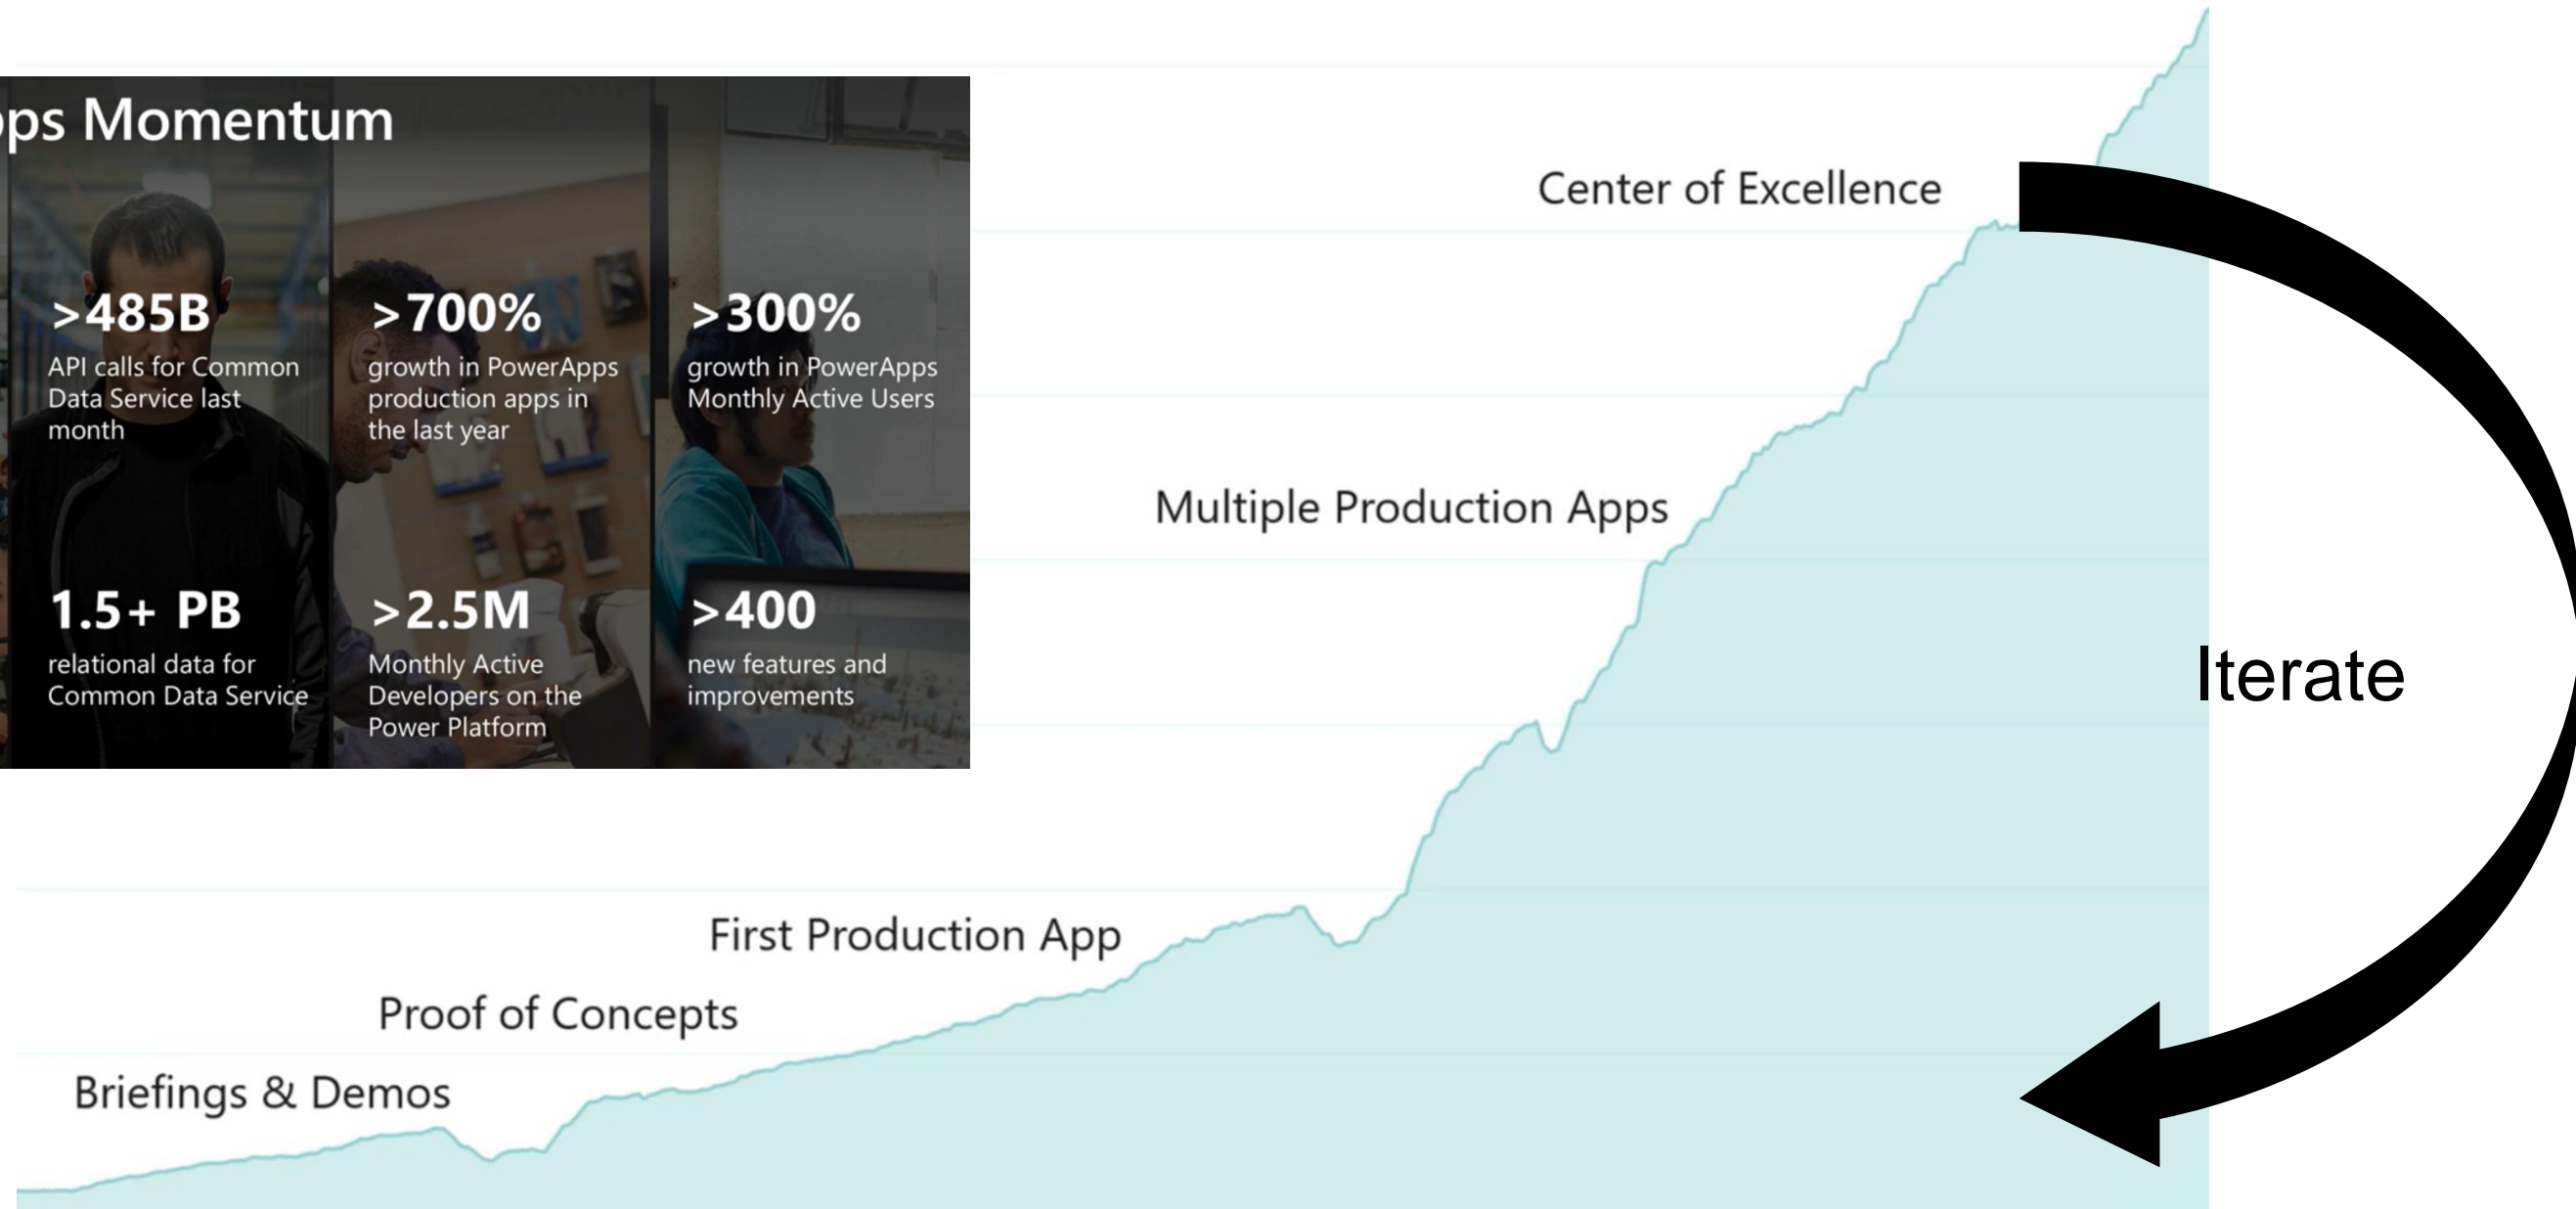

Benefits

- Reduction of costs and time
- Faster and more accurate information assembling
- Survey results fed straight into system, eliminating manual processes
- Faster response to pest control, preventing damage

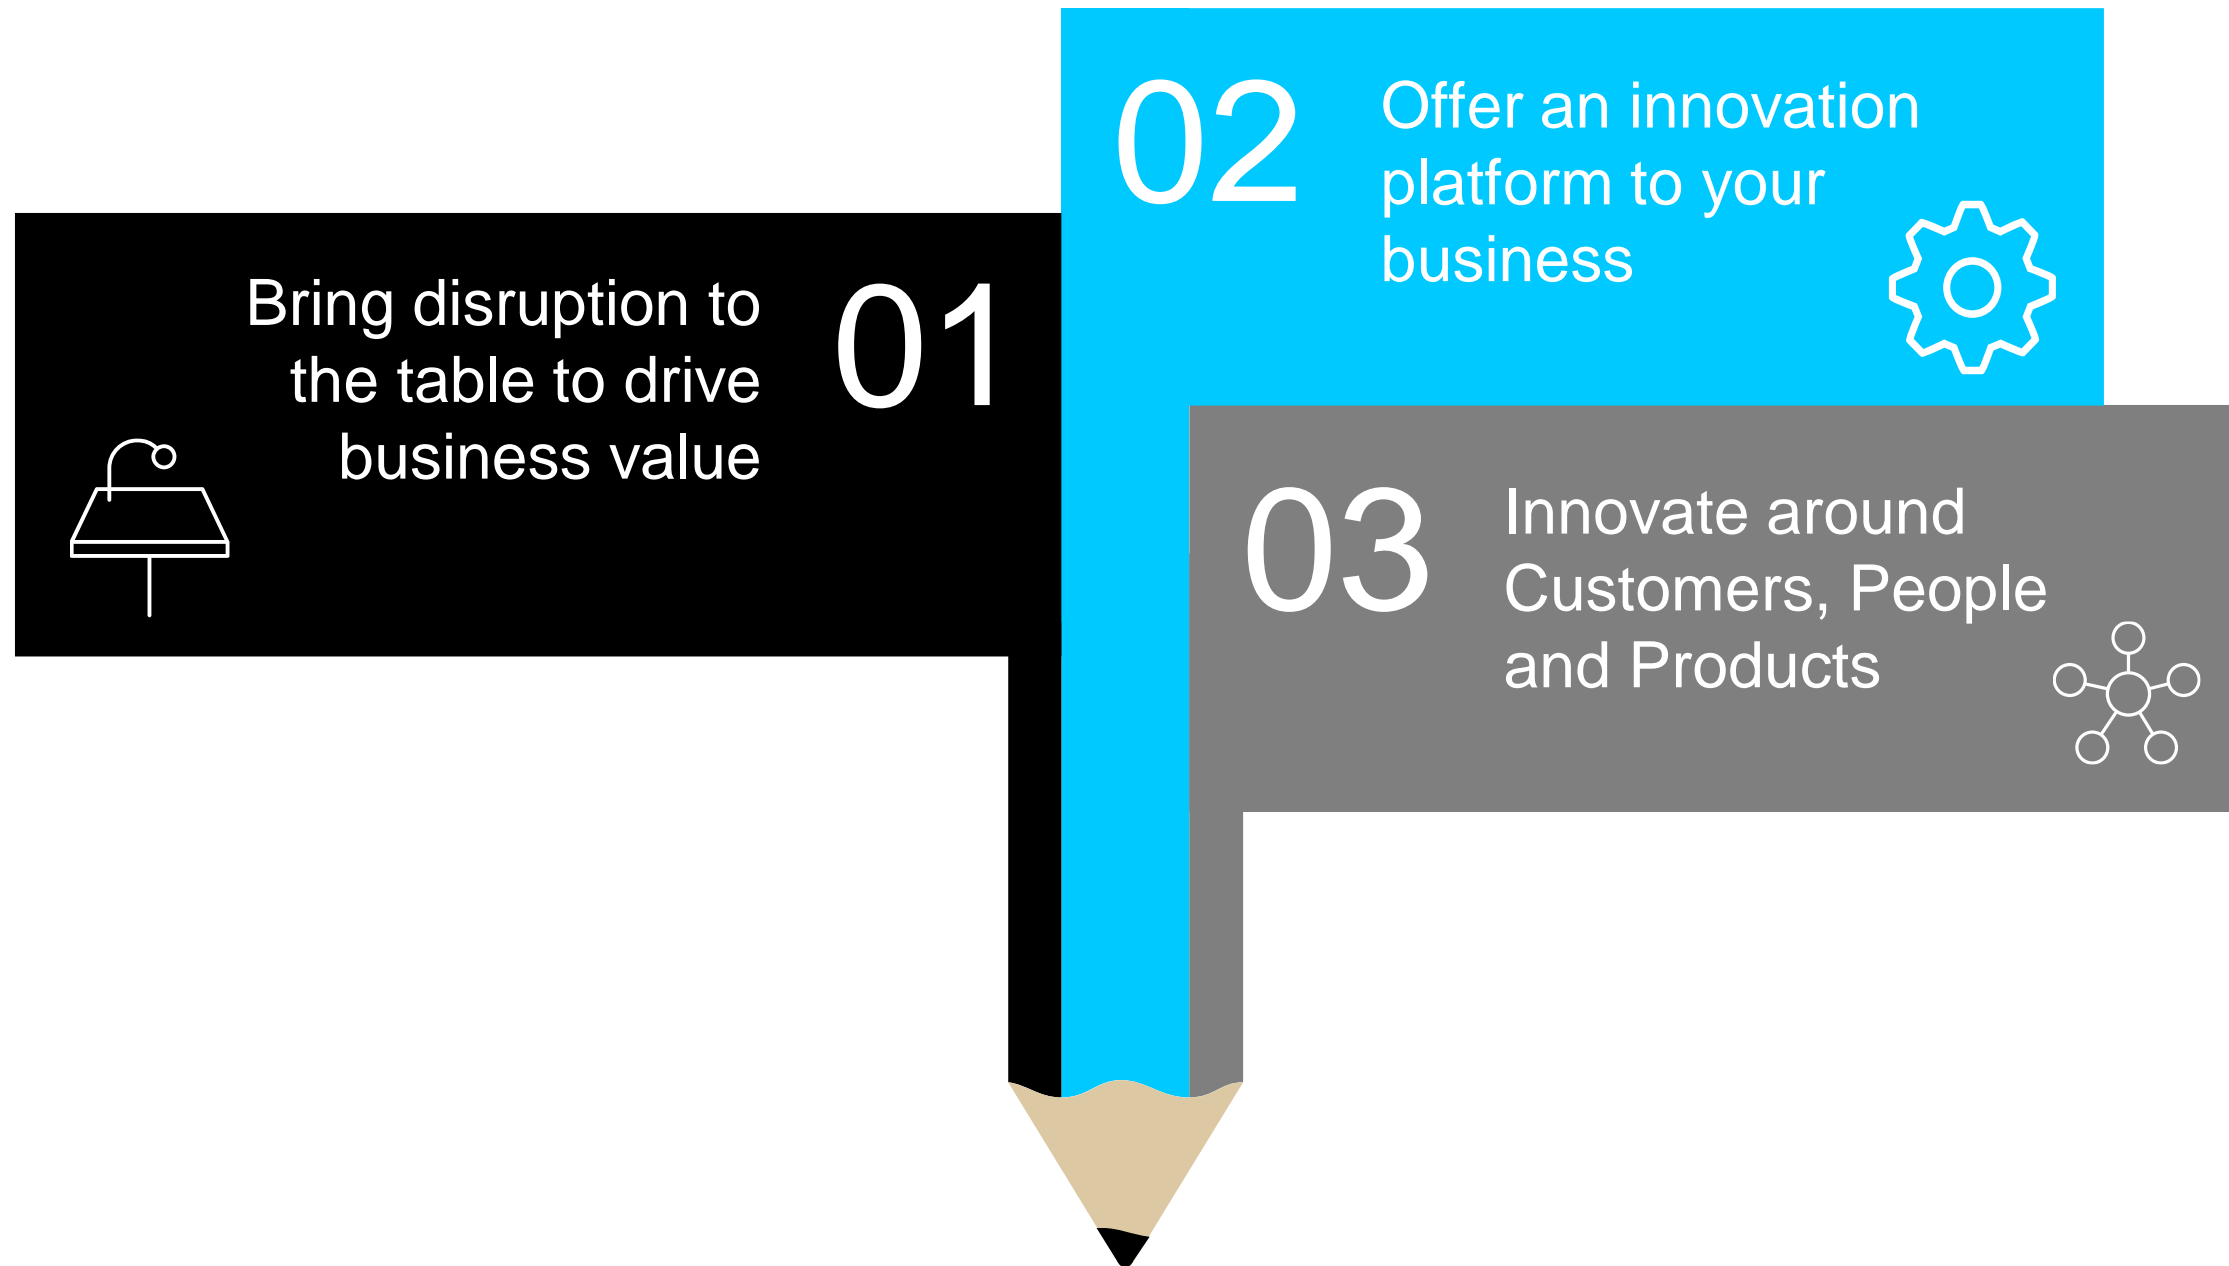

It's a destination and a journey, not a product

PowerApps Momentum

>485B API calls for Common Data Service last month	>700% growth in PowerApps production apps in the last year	>300% growth in PowerApps Monthly Active Users
1.5+ PB relational data for Common Data Service	>2.5M Monthly Active Developers on the Power Platform	>400 new features and improvements

Our Advice

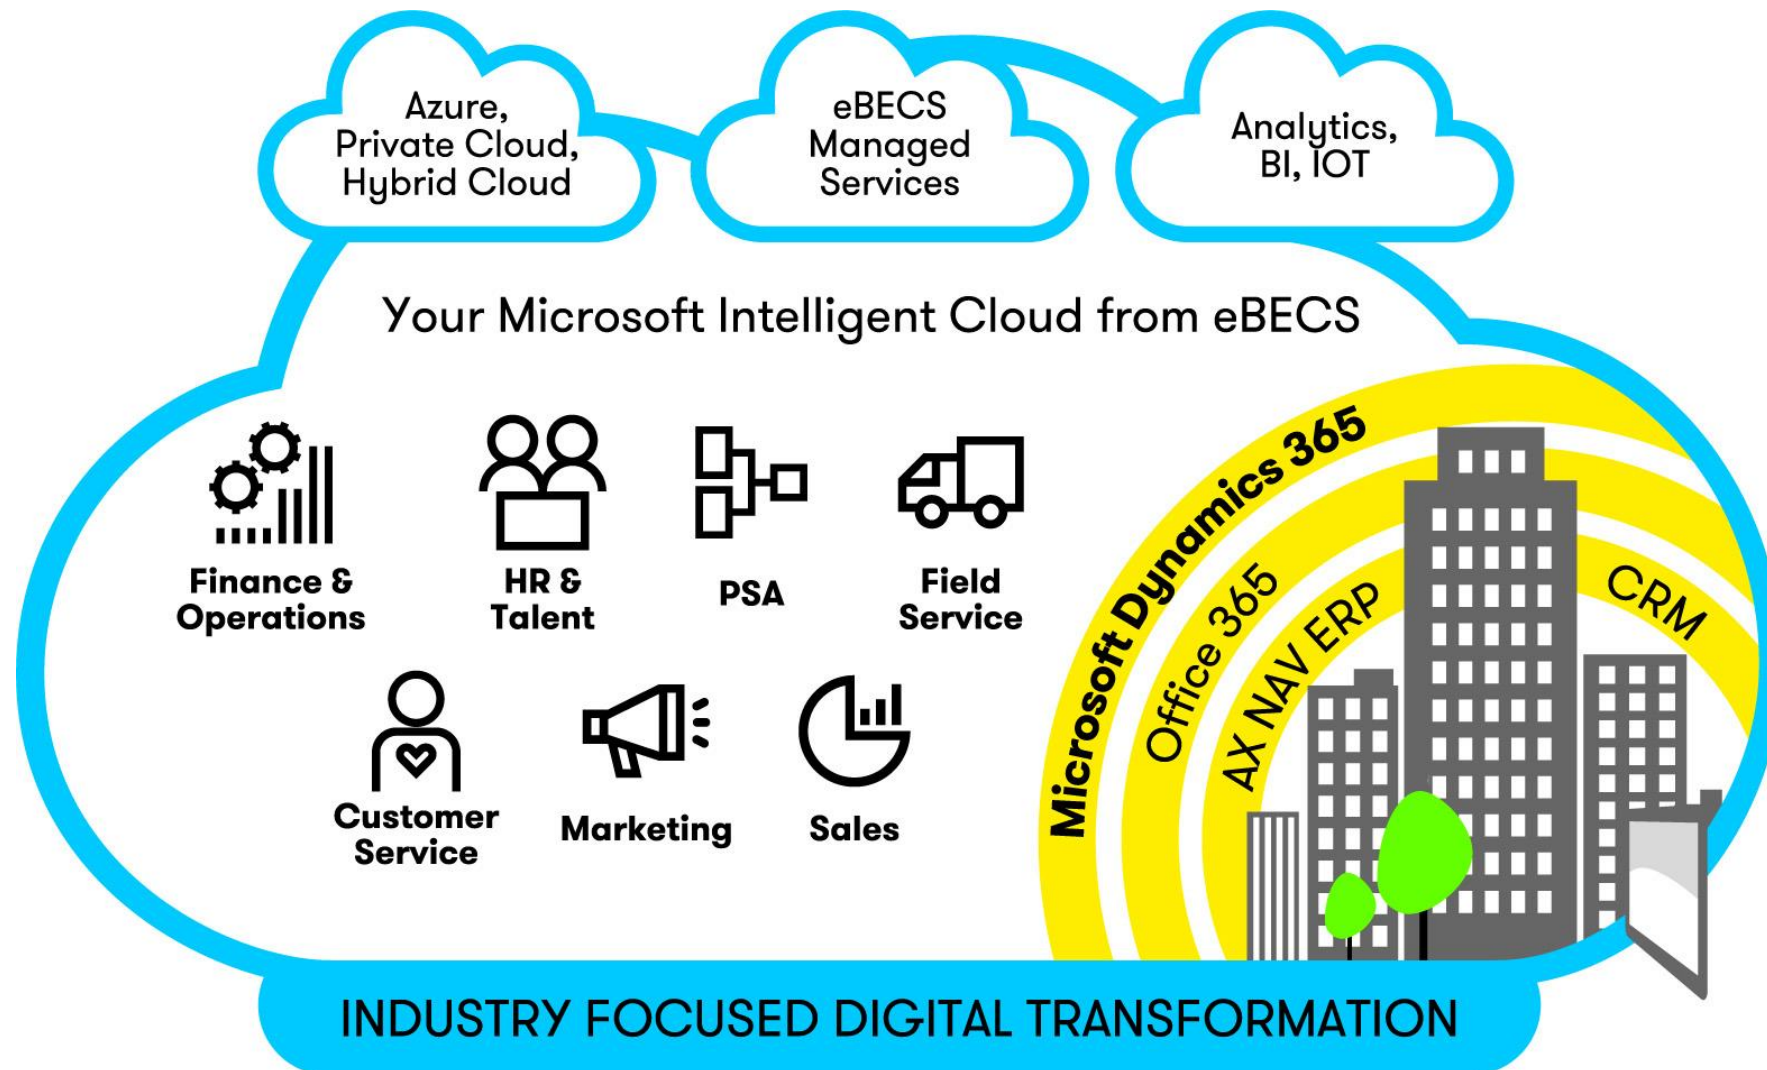

Thank you.

About DXC Technology

DXC Technology (DXC: NYSE) is the world's leading independent, end-to-end IT services company, helping clients harness the power of innovation to thrive on change.
