

# Are you truly aware?

- How effectively do your employees work
- How efficient are your machines
- Where are your machines at the moment
- Who used your machine and when
- How fast will you receive information about a breakdown or unplanned downtime

## WHAT IS EBKF FLEET MANAGER?

It is an innovative telemetric solution for monitoring machines and operators.

Thanks to the use of specialized sensors and algorithms, the tool collects, analyzes and interprets obtained data. You receive 24/7 access to such data through a website or a mobile application.

EBKF is dedicated to organizations that wish to gain control over the processes taking place within the company as well as increase both the quality and culture of work. Furthermore, EBKF Fleet Manager also supports property management for shopping centre managers and public institutions.

Collect and analyze the acquired data, manage all machines in one place on the screen of your tablet or phone.

## ADVANTAGES OF IMPLEMENTING EBKF in your company

Thanks to EBKF you will be able to:

account employees and subcontractors for the exact working time

reduce machine maintenance costs

improve the quality and culture of work

support decision-making processes

manage changes and processes via the Internet

extend the lifespan of machines and batteries

## The universality of EBKF Fleet Manager

Our solution supports a fleet of machines, regardless of their brand, year of production, or country of origin. Its universal application provides the opportunity to connect it to additional sensors.

### EBKF HELPS THE FOLLOWING INDUSTRIES:

- ✓ welding technology
- ✓ production
- ✓ shipyard industry
- ✓ refrigerating industry
- ✓ energetics
- ✓ shopping and industrial facilities
- ✓ public institutions
- ✓ mining industry
