Request + Work Management

Request + Work Management

Manage workflows and **streamline your internal requests** to the correct systems, managers, auditors, stakeholders, and departments.

The average employee loses 15 minutes a day as a result of **inefficient workflow**. Now, that might not sound like a lot, but **in a business of 100 staff**, that's **6000 hours of lost productivity a year**.

Is your organisation struggling with these challenges?

▶ Staff are making mistakes and giving incorrect information

▶ Many bottlenecks through query processes

▶ Lack of communication across teams

▶ Lack of transparency between managers and employees

▶ Many different internal systems that don't speak to each other
