DIGITALL COPILOT ADOPTION OVERVIEW

Scope & Stages of the Adoption

Our Copilot Adoption Strategy comes with three comprehensive masterclass sessions. We will equip your AI Community with tailored use cases and scenarios for optimal individual and departmental results. Our approach includes an initial assessment, the creation of a robust AI Community, and practical application, resulting in measurable progress and success metrics.

Stage 1
Assessment & Current Status Review

- ✓ Evaluation of the current AI capabilities
- ✓ Evaluation of the current technical skills from licensed users

Stage 2
Establishment of a Powerful AI Community

- ✓ Map the AI Community roles and responsibilities
- ✓ Define user experience feedback
- ✓ Launch employee communications and Champion program.

Stage 3
Master Class Sessions

- ✓ Dive into hands-on experience with tailored, practical sessions
- ✓ Leverage real-world examples to streamline workflows and boost productivity, ensuring your organization stays at the forefront of AI innovation

Stage 4
Future Progress & KPI Metrics

- ✓ Setup metrics to track ongoing AI success
- ✓ Ensure continuous improvement and alignment with the organization's strategic goals

Stage 5
Copilot Enablement Service

- ✓ Continuing prompt support and output review
- ✓ Troubleshooting and continuous optimization of DATA accuracy and returned prompt results
- ✓ Continuous development of company's department specific use cases
- ✓ Establishment of SharePoint Online site with latest trend prompts and updates for Copilot

Duration: 10-40 days **Location:** Online **Part of the roles involved:** CTO, CIO, COO, Head of IT, Business and Technical Team Champions

Experience the unmatched benefits of our offering, grounded in:

- In-depth analysis for technical skills of licensed users
- Creation of a robust AI Community
- Workshops tailored to meet specific customer needs
- Exclusive model for monitoring and measuring AI success
