COPILOT FOR MICROSOFT 365 ADOPTION ACCELERATOR

DRIVE TRANSFORMATION WITH COPILOT

The **Microsoft 365 Copilot Workshop**, in collaboration with **ECF Data**, is designed to enhance productivity across essential applications such as Microsoft Teams, Word, Excel, and PowerPoint. This workshop aims to **empower organizations to leverage AI effectively, transforming everyday tasks into opportunities for innovation and efficiency.**

WORKSHOP STRUCTURE

1 ASSESS

- Define the scope and identify key business stakeholders.
- Gather information on critical business scenarios.
- Complete a readiness assessment to understand current capabilities.

2 ART OF THE POSSIBLE

- Showcase the potential of M365 Copilot in enhancing employee experiences.
- Demonstrate how creativity can be unleashed and productivity unlocked through practical examples.

3 BUILD THE PLAN

- Develop an actionable implementation plan based on prioritized scenarios.
- Outline next steps and establish a timeline for solution development.

BENEFITS OF THE PARTICIPATION

Drive Business Results
Utilize M365 Copilot scenarios to enhance productivity and connectivity within your organization.

Accelerate Outcomes
Empower employees to embrace transformation with a clear adoption framework.

Enable Future Growth
Create a roadmap that outlines potential workstreams, dependencies, and actionable next steps.

WHY WORK WITH ECF DATA

STRATEGIZE & PILOT
Identify impactful use cases and validate capabilities before launching a pilot program.

CHANGE OF STRATEGY EXECUTION
Develop an adoption strategy and execute campaigns while ensuring governance and stakeholder engagement.

TECHNICAL READINESS & PLANNING
Configure environments, analyze data governance risks, and create a long-term technical roadmap.
