Fortify your data security

With more people working remotely, organizations need to know that their employees can securely access their data from their devices, almost anywhere.

|		
Data security incidents are growing	**59**	Average number of incidents experienced annually by data security teams.[1]
Poor data security puts business at risk	**74%**	Number of surveyed organizations that discovered a data incident in the past year.[1]
Fragmented security weakens protection	**2.8x**	The likelihood that a business using 16+ security tools will have a data incident compared to one with fewer tools.[1]

Data security needs layers of protection, throughout its lifecycle.

It's time for a new approach:
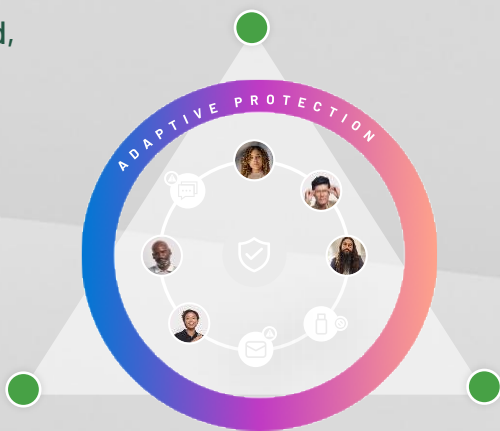

ECF and Microsoft Purview

ECF and Microsoft Purview protects sensitive data—wherever it lives. Comprehensive, defense-in-depth data security integrates information protection, data loss prevention, insider risk management, and adaptive protection into one solution, helping you mitigate data risk.

Support for multi-cloud, hybrid, SaaS data

- Protect sensitive data
- Prevent data loss
- Manage insider risks

ADAPTIVE PROTECTION

What makes ECF and Microsoft Purview different?

A simple, and intelligent solution for all your data

Visibility across your entire digital estate

Comprehensive data security with integrated solutions

AI-powered security to prevent potential incidents

As a Microsoft Partner, we offer:

Protection of data, identities, endpoints, and email across your hybrid and cloud infrastructures. We also help you meet regulatory, industry, or local requirements.
