

Protect Your Business with Advanced Identity & Access Management

As businesses transition to the cloud, ensuring the security and control of user identities, application access, and sign-in capabilities is critical. ECF Data's Advanced Identity Solutions enable organizations to strengthen their security posture while simplifying access for employees and IT administrators.

KEY BENEFITS

Enhanced Security

Protect user identities with multi-factor authentication and advanced access policies.

Simplified Access

Provide seamless sign-in across on-premises and cloud applications.

Centralized Identity Management

Synchronize on-premises Active Directory with Azure Active Directory (Azure AD) for a unified identity solution.

Improved IT Control

Gain greater visibility and control over authentication and access management.

COMPREHENSIVE IDENTITY MANAGEMENT APPROACH

ASSESSMENT

- Conduct consultation workshops to define business goals and identity management needs.
- Perform a detailed evaluation of on-premises Active Directory and infrastructure.
- Deliver a Cloud Discovery Report with recommendations and best practices.

IMPLEMENTATION

- Deploy Azure AD identity and access management solutions tailored to business needs.
- Implement a pilot phase before full deployment to ensure optimal configuration.
- Configure security elements such as password protection, seamless sign-on, and conditional access.

MANAGEMENT & ONGOING SUPPORT

- Provide advanced monitoring and maintenance of identity synchronization services.
- Implement patch management, troubleshooting, and compliance monitoring.
- Offer 24/7 support to ensure continuous identity security and operational efficiency.

WHY CHOOSE ECF DATA

As a trusted Microsoft Solutions Partner, ECF Data delivers tailored identity and access management solutions that enhance security, streamline access, and simplify IT administration. With extensive experience in cloud solutions, we ensure seamless identity management for modern businesses.
