MICROSOFT 365 SECURE SCORE ASSESSMENT

The Microsoft 365 Security Assessment offers a comprehensive evaluation of your organization's security environment, recommendations on optimizing tool usage, and a roadmap to address any identified issues or vulnerabilities.

WHAT IS MICROSOFT 365 SECURE SCORE?

Microsoft 365 Secure Score is a valuable security analysis tool for organizations, offering the following advantages:

- Overview of the organization's current security standing
- Taking a proactive stance towards security
- Enhanced visibility and guidance to enhance network protection
- KPIs vs. other organizations in your industry
- Compare the current state of the network with historical benchmarks
- Recommendations for strengthening the network and addressing security vulnerabilities
- Use of visuals (ex. graphs and charts) for easy consumption
- Establish network alignment with NIST compliance standards.
- Deliver a concise and easily comprehensible report
