COMPANY OVERVIEW

ECF Data specializes in delivering cutting-edge security operations solutions tailored for the healthcare sector. Our expertise lies in leveraging modern technologies, particularly Microsoft Sentinel, to enhance security postures and ensure compliance with industry standards. We provide comprehensive services that encompass threat detection, incident response, and continuous monitoring, aimed at safeguarding sensitive healthcare data.

KEY SERVICES

Modern SecOps Engagement:

A structured approach to security operations that includes:

- Deployment of Microsoft Sentinel and integration with existing systems.
- Hands-on training for staff on threat discovery and analysis.
- Development of a defined roadmap for security implementation.

Threat Exploration

In-depth analysis of potential attack vectors using advanced analytics and threat intelligence.

Continuous Improvement

Ongoing support to refine security measures based on evolving threats and organizational goals.

CORE COMPETENCIES

Cloud-Native Security Solutions

Implementation of Microsoft Sentinel, a fully cloud-native Security Information and Event Management (SIEM) platform, to address today's cybersecurity challenges.

Proactive Threat Management:

Offering remote monitoring and threat hunting services to identify and mitigate potential threats before they escalate.

Customized Security Operations

Modular engagement models that allow healthcare organizations to tailor security operations according to their specific needs and risk profiles.

Comprehensive Visibility

Gaining insights across all data sources—email, identity, endpoints, and third-party applications—to enhance threat detection capabilities.

BENEFITS OF PARTNERING WITH ECF DATA

EXPERTISE IN MICROSOFT TECHNOLOGIES

In-depth analysis of potential attack vectors using advanced analytics and threat intelligence.

24/7 SUPPORT

Industry-leading technical support available around the clock to address any security concerns promptly.

ENHANCED EFFICIENCY

Reduction in case management time by approximately 50%, as reported by clients utilizing our services.
