ECF DATA

Strengthen Your Security with Microsoft Sentinel & Unified SecOps

Cyber threats are evolving—stay ahead with **ECF Data's Modern SecOps Engagement**. Whether you need a Security Operations Center (SOC) or want to enhance existing monitoring, ECF Data offer expert guidance to help you detect, investigate, and respond to threats efficiently.

KEY BENEFITS

＋ Proactive Threat Detection
Gain real-time insights and identify threats before they cause harm.

＋ End-to-End Security Visibility
Monitor threats across email, identity, endpoints, and third-party data.

＋ Automated Incident Response
Leverage AI-driven analytics to improve efficiency.

＋ Customizable Engagement
Tailored to meet your organization's unique security needs.

＋ Seamless Integration
Deploy Microsoft Sentinel and Defender XDR across on-premises and cloud environments.

WHY CHOOSE ECF DATA

Threat Discovery & Response
Identify vulnerabilities and mitigate cyberattack vectors.

Remote Monitoring (Optional)
Enhance your SOC with Microsoft Sentinel's capabilities.

Hands-on Experience
Learn to automate security operations and improve defenses.

Deployment & Roadmap
Define a clear SIEM strategy aligned with your goals.

WHY CHOOSE ECF DATA

▶ **Microsoft-certified experts** in security and cloud solutions.

▶ **Comprehensive support** for security operations, compliance, and AI-powered threat intelligence.

▶ **Dedicated technical and customer support –** ensuring protection 365/24/7.
