Fellowmind

Key User service

We offer our customers an administrator service to support the use and maintenance of the system

Brief description of the service:

The purpose of the Key User consultancy service is to provide the customer with better knowledge and management of the basic Dynamics 365 Business Central solution – without low initial investment:

- More systematic system maintenance
- Necessary coaching and support for development
- New solutions and ways of working to support the company's business
- Better understanding of combining business and operating environment with ERP

Price: agreed according to the service package

Want to know more?

Contact us at Fellowmind or fill out a contact request on our web page and our experts will contact you as soon as possible so that you can agree on a more detailed time and other details of the service.
