# Edgecom Energy

UNLEASH YOUR PRODUCTION POTENTIAL

# dataTrack™

Experience the cutting-edge power of dataTrack™, the ultimate platform for real-time energy monitoring. Powered by IoT and AI, this innovative solution elevates your operational efficiency, enhances visibility, and delivers substantial cost savings.

# Measure, Monitor, Save

Keep a real-time pulse on energy, water, and gas usage through our intuitive dashboard.

Slash costs, optimize energy consumption, and maximize production yield with immediate insights.

Make informed decisions based on up-to-the-minute data, effortlessly accessed through our user-friendly platform.

## AI-POWERED

Harness the power of machine learning for consumption insights, problem identification, and actionable improvement suggestions.

## REAL-TIME

Demystify your utilities with real-time data, enabling prompt and informed decision-making.

## ONE PORTAL

Say goodbye to manual monitoring energy data are aggregated in one centralized location. Set up alarms for remote monitoring, ensuring proactive responses to potential issues.

## MORE REVENUE

Optimize energy usage and prevent costly electricity spikes to achieve significant long-term cost savings.

# PLUG AND PLAY

Experience unparalleled ease with Edgecom Energy's IoT devices, ensuring a swift and effortless setup that gets your data streaming to the online portal within mere hours.

Embrace the future of Industrial IoT with cutting-edge innovations, offering not just wireless freedom but also top-tier security. Say goodbye to IT hassles, training woes, and the need for local network connections.

Seamlessly integrate with APIs tailored for industrial automation systems and effortlessly connect with your current IoT sensors. With dataTrack™, unlock a realm of unparalleled efficiency, savings, and growth – your key to a smarter and more lucrative future in production

# AI ENERGY COPILOT

The AI Energy CoPilot uses advanced tech as a personal assistant, providing quick insights into energy usage and energy costs. This AI technology speeds up decision-making and promotes proactive actions, making it an indispensable tool for facility operations.

The AI Energy CoPilot seamlessly integrates with dataTrack™, automatically providing an unparalleled value enhancement, which elevates your energy management experience with this powerful combination.

Give me a brief summary of my energy consumption this month.

Your overall energy consumption so far this month is 570.09 kWh. The highest energy consumer is your Boiler which consumed 250.38 kWh this month, which is 7% above the normal range. Your monthly overall energy consumption is average in comparison to previous months.

Device Consumption Breakdown    Month to Month Comparison    Learn more about Sensors

## WHAT CAN I ASK THE ENERGY COPILOT?

- Energy Consumption Usage
- Energy Consumption Costs
- Minimum / Maximum Consumptions Ranges
- Sensor Availability and Health
- Analyze data in a CSV File

- Comparative Analysis of Energy Consumption
- Emission Amounts
- Analyze data in a CSV File
- System Troubleshooting & FAQ

# WHAT CUSTOMERS ARE SAYING

>

To have all of that data across multiple resources aggregated in one platform, it's a huge time-saver.

Taylor Stanley,
Impact Strategy Manager,
Riverside Naturals

>

Having that monitoring at a granular level where everything is being monitored, gives you an overall snapshot of where the energy is being used and how you can utilize it better.

Brandon Hastie
Industrial Engineer,
Bock North America

## ABOUT US

At Edgecom Energy, we empower large energy consumers to take control of their energy costs and reduce emissions by harnessing the power of IoT and AI solutions. Our innovative technology helps you optimize energy usage, save money, and contribute to a greener, more sustainable future.

## WHY CHOOSE US?

Unlike competitors offering partial solutions, Edgecom Energy offers a comprehensive platform that integrates all aspects of energy management, delivering unmatched convenience and efficiency compared to partial solutions.
