Seamlessly Unifying Human-Digital Workforce

Automation Singularity
Led by Humans

Get Ready For The Future Of Automation

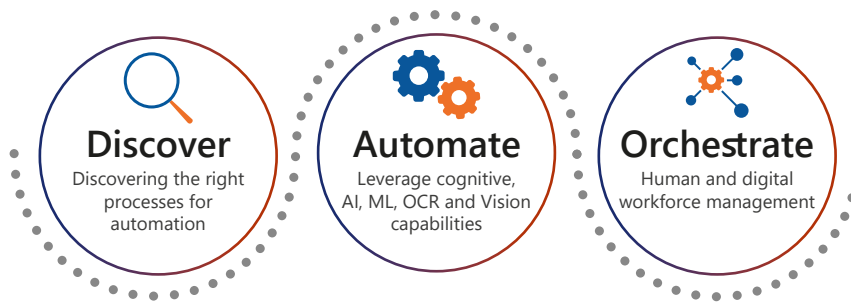

Automation Singularity refers to a customer-centric workforce of the future that opens up a new horizon of endless possibilities.

It has the potential to bring the humans and the evolved digital workers closer than they have ever come before. This unified human-digital workforce will represent a powerful blend of advanced capabilities that will drive the enterprise of the future. Businesses must prepare for this next big leap in automation.

AssistEdge - A Holistic Automation Platform

AssistEdge is a leading automation platform with advanced AI capabilities offering a comprehensive suite of products across Process Discovery, RPA and Orchestration.

AssistEdge RPA 18.0 is an enterprise-grade product that excels in enabling businesses adapt to market challenges that demand scalability, security, intelligence and innovation. It spans across the automation continuum from deterministic through intelligent to human-empowered automation.

Journey Towards Automation Singularity

Delivering pervasive intelligence

the cognitive engine

Pushing automation frontier

of complex processes

Optimizing infrastructure to scale

100 Bots

on a single VM

Built-on strong innovation

18

patent assets

AssistEdge RPA 18.0 - Key Features

Computer Vision & OCR Services on tap

Automate processes involving extraction of information embedded in documents like images, handwritten notes, prints & scans using cognitive services on tap

Contextual Intelligence

Albie enables digital workers to observe, learn and solve business problems. It empowers human workers with contextual insights, to identifying process redesigning opportunities.

Business Intelligence Dashboards

Framework to capture business-relevant data for creating dashboards around historic information, forecasts & business impacts (e.g. invoice clearance rate, amount cleared etc.)

Smart Resource Management

Predictive alerts around bot performance and SLA failures with ability to scale dynamically for increased bot reliability. Bots can now be managed on the move via iPad

Expanded Automation Footprint

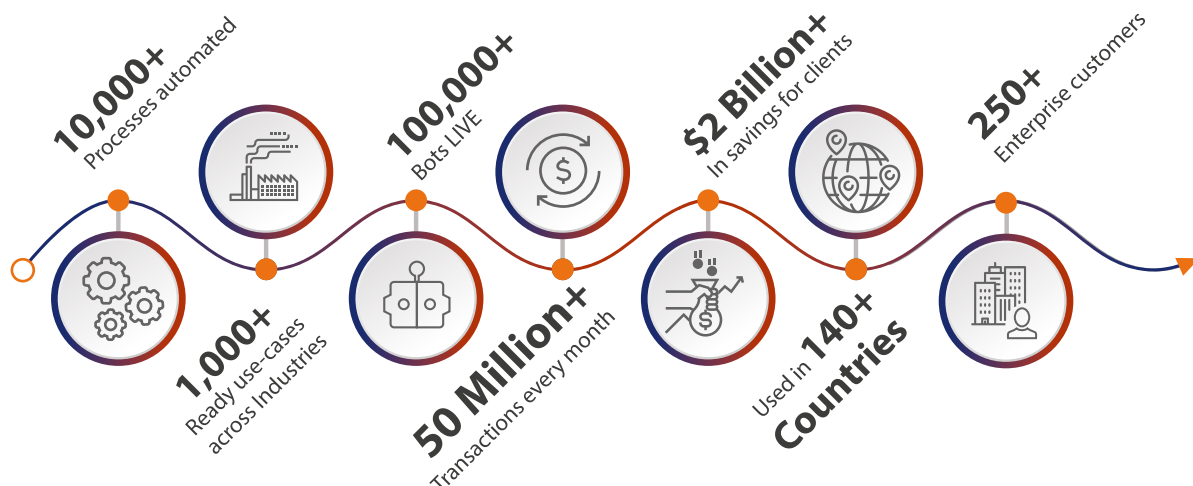

Coverage of Citrix farms/ VDI increase ability to expand automation across the enterprise. Out-of-the-box multi-lingual support, including Japanese, Spanish & French

Enterprise-grade Security

GDPR ready. Integrated with CyberArk credential vault, SAML and OpenID Connect-based authentication. Introduction of access modes to prevent unauthorized access

Key Highlights

Case Studies
