Amplify Intelligent Automation with Process Insights

Discover New Possibilities

With Process Discovery

DISCOV
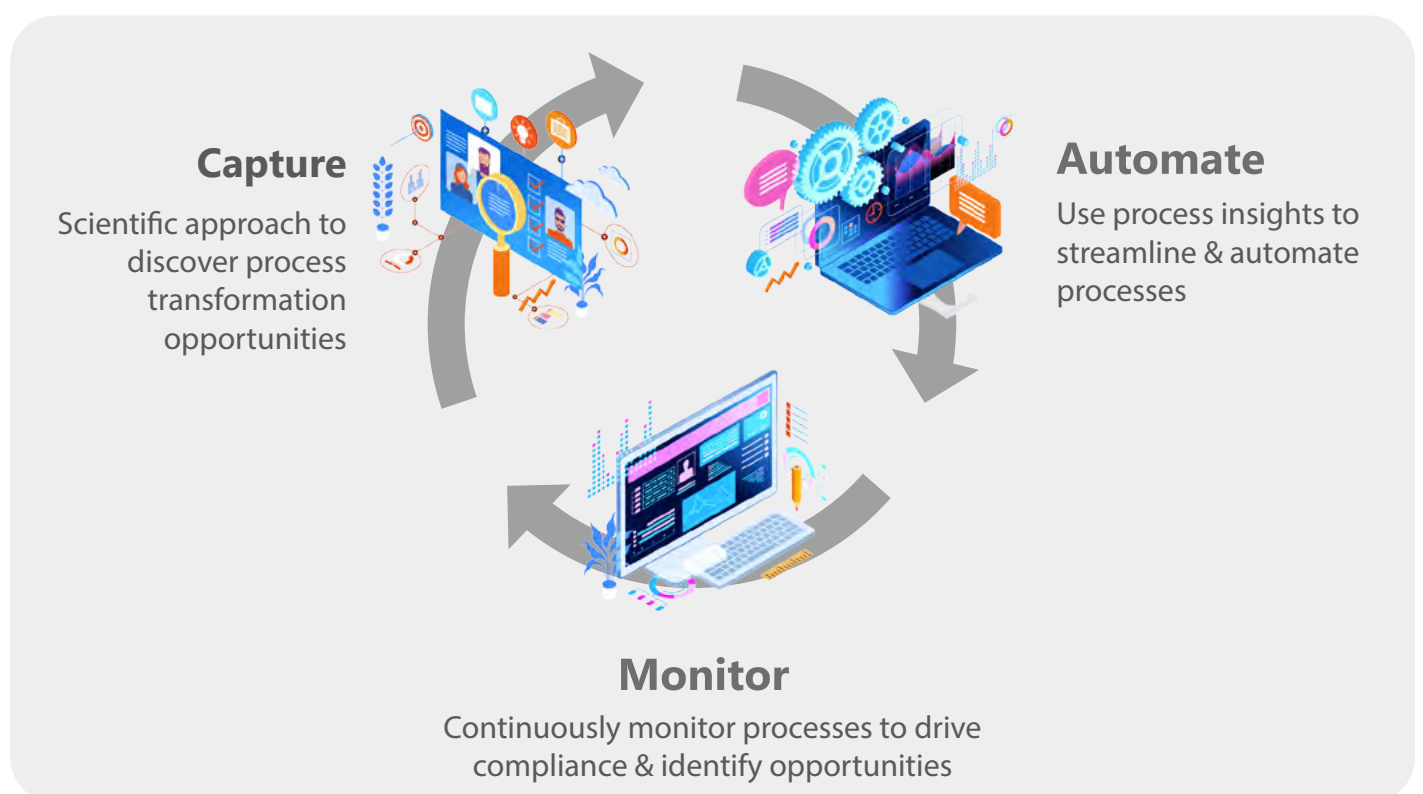

Product
brochure

Enterprises today are constantly adapting to changing customer needs, significant cost pressures, intense competition and disruption in supply chain. To meet these challenges, enterprises need to be agile, hyper-productive and resilient. While this had led to enterprises investing heavily in Digital Transformation & Intelligent Automation; task mining can provide granular data to improve overall process visibility that can enable enterprises to address gaps in realizing value from their investments.
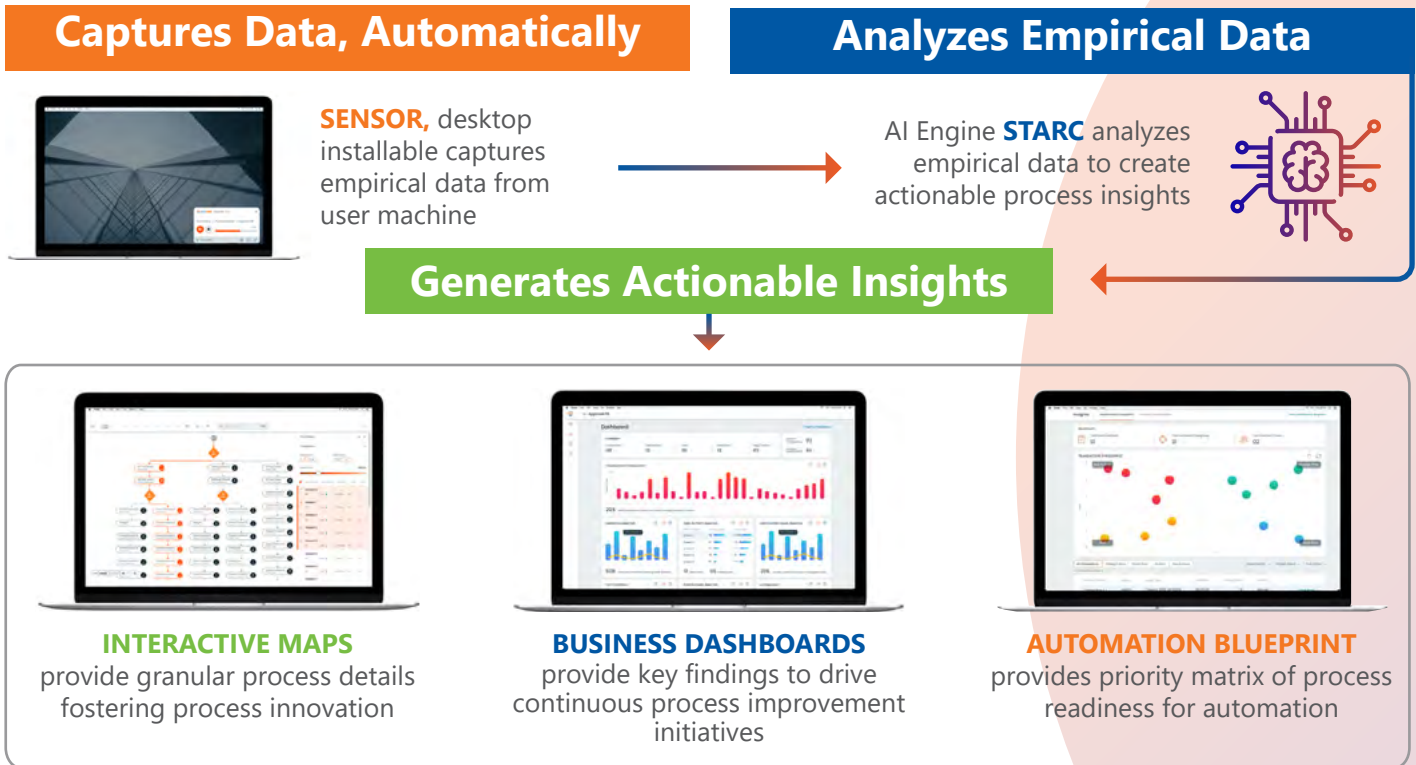

Introducing AssistEdge Discover

AssistEdge Discover unlocks the hidden business value trapped in your processes. It acts as a powerful foundation for enterprises seeking cutting-edge technology, to drive intelligent automation and process excellence. From non-intrusively capturing human-machine interactions to leveraging AI to creating actionable process insights, AssistEdge Discover sets you on the right path to embrace continuous improvement with relentless focus on creating a hyper productive enterprise.
Capture
Scientific approach to discover process transformation opportunities

Automate
Use process insights to streamline & automate processes

Monitor
Continuously monitor processes to drive compliance & identify opportunities

How does AssistEdge Discover work?

Captures Data, Automatically

SENSOR, desktop installable captures empirical data from user machine

Analyzes Empirical Data

AI Engine **STARC** analyzes empirical data to create actionable process insights

Generates Actionable Insights

INTERACTIVE MAPS
provide granular process details fostering process innovation

BUSINESS DASHBOARDS
provide key findings to drive continuous process improvement initiatives

AUTOMATION BLUEPRINT
provides priority matrix of process readiness for automation

Key highlights

Smart Sensor for Data Capture
Enables enterprises to digitize processes in their current state with granular nuances

Insights & Process Visualization
Discover's AI engine converts empirical data into insightful process maps, process insights

Process Design Document in a click
Enterprises can provision processes for automation accurately by downloading a PDD

Collaborate & Enrich Process Maps
Teams can jointly review, add, delete or group process steps to enrich process maps

Prioritize processes for Automation
Automation Blueprint helps enterprises to shortlist process that are ready for automation

Secure, Privacy Compliant
GDPR ready. Data encryption as default. Role-based access control. Data minimization
