

INFORMATION AND CLOUD SECURITY

Communication Security Quick Start

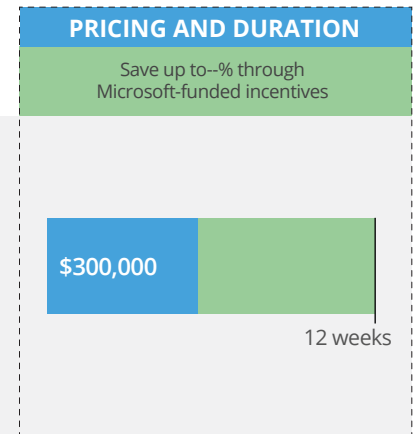

Protect your data and workloads

Is your organization heavily invested in Microsoft cloud platforms, including Exchange Online, SharePoint Online, OneDrive for Business, and Microsoft Teams, for content management and user collaboration? Edgile can help you leverage the control frameworks of the Microsoft Defender for Office tool set to protect your data and workloads.

Communication Security Quick Start improves time to value

The Communication Security Quick Start is a predictable and reliable program that allows you to immediately leverage your Microsoft investments. You'll receive high velocity, measurable outcomes and initial control frameworks for communication and collaboration data inside M365—at a fixed price in a fixed time frame.

- Discover and define current state requirements and security protocols
- Define anti-spam, anti-malware, anti-phishing, safe attachments, and safe links policies tailored to business need and Microsoft recommendations
- Get additional layers of protection for C-suite and other high value users by defining priority accounts
- Launch attack simulation training payloads
- Enable automated investigation and response for email messaging traffic
