Microsoft Endpoint Security Quick Start

Workstream

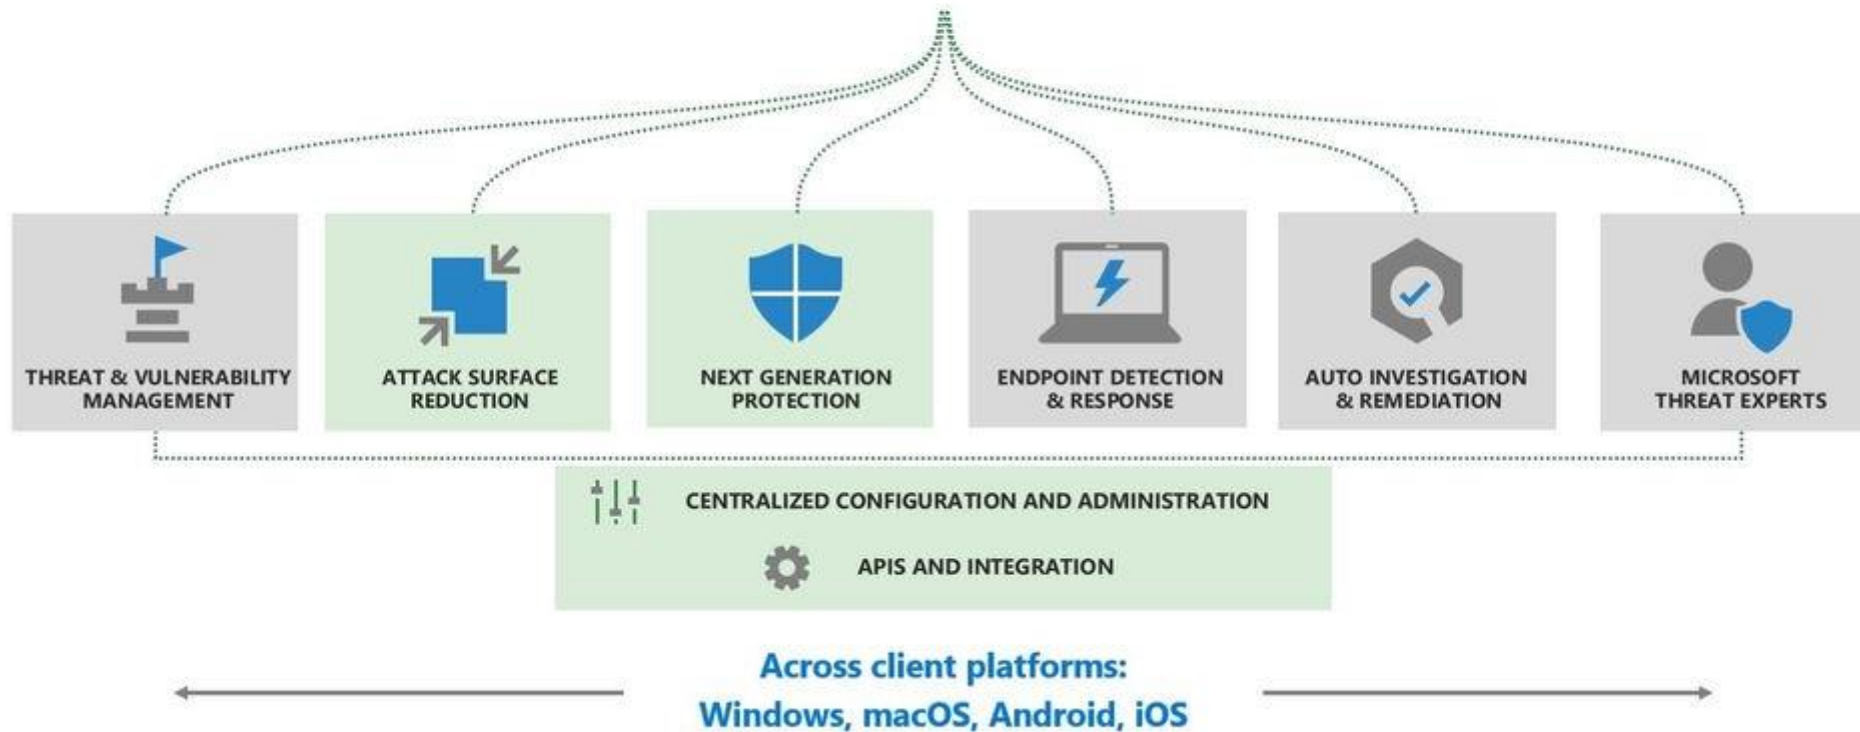

Outcomes

| | | |
|----------|--|--|
| 1 | Discovery & Design | Discovery and analysis of data in a client Microsoft 365 tenant, identification and interview of priority stakeholders, development of endpoint security requirement definitions, and develop endpoint security control design specifications. |
| 2 | Onboarding and Configuration | Delivery of an initial configuration in production for Microsoft Intune onboarding prerequisites and deploy pilot onboarding group |
| 3 | Integration Testing | Delivery of an initial production rollout plan and assign configured policies to production devices on a per-group basis |
| 4 | (Optional) Configure MDE integration with additional Microsoft services | Delivery of an initial integration of MDE with Defender for Identity, Defender for Office and Defender for Cloud Apps |
| 5 | (Optional) Configure up to 6 custom MEM policies | Delivery of an initial configuration of custom MEM policies and an architectural document of each policy. |
| 6 | Monitoring and Support | Monitor and produce data risk analytics by content sensitivity, activity, and traffic. Define an Endpoint Security Operations plan for ongoing tuning and response workflows |
