Microsoft Hybrid Identity Security Quick Start

Workstream

Outcomes

1

Discovery & Design

Discovery and analysis of data in a client Microsoft 365 tenant, identification and interview of priority stakeholders, development of identity security requirement definitions, and develop identity security control design specifications.

2

Onboarding and Configuration

Delivery of an initial configuration in production for Microsoft Defender for Identity and integrate with Microsoft Defender for Cloud Apps for discovery

3

Integration Testing

Delivery of an initial production rollout plan and assign configured policies to production devices on a per-group basis

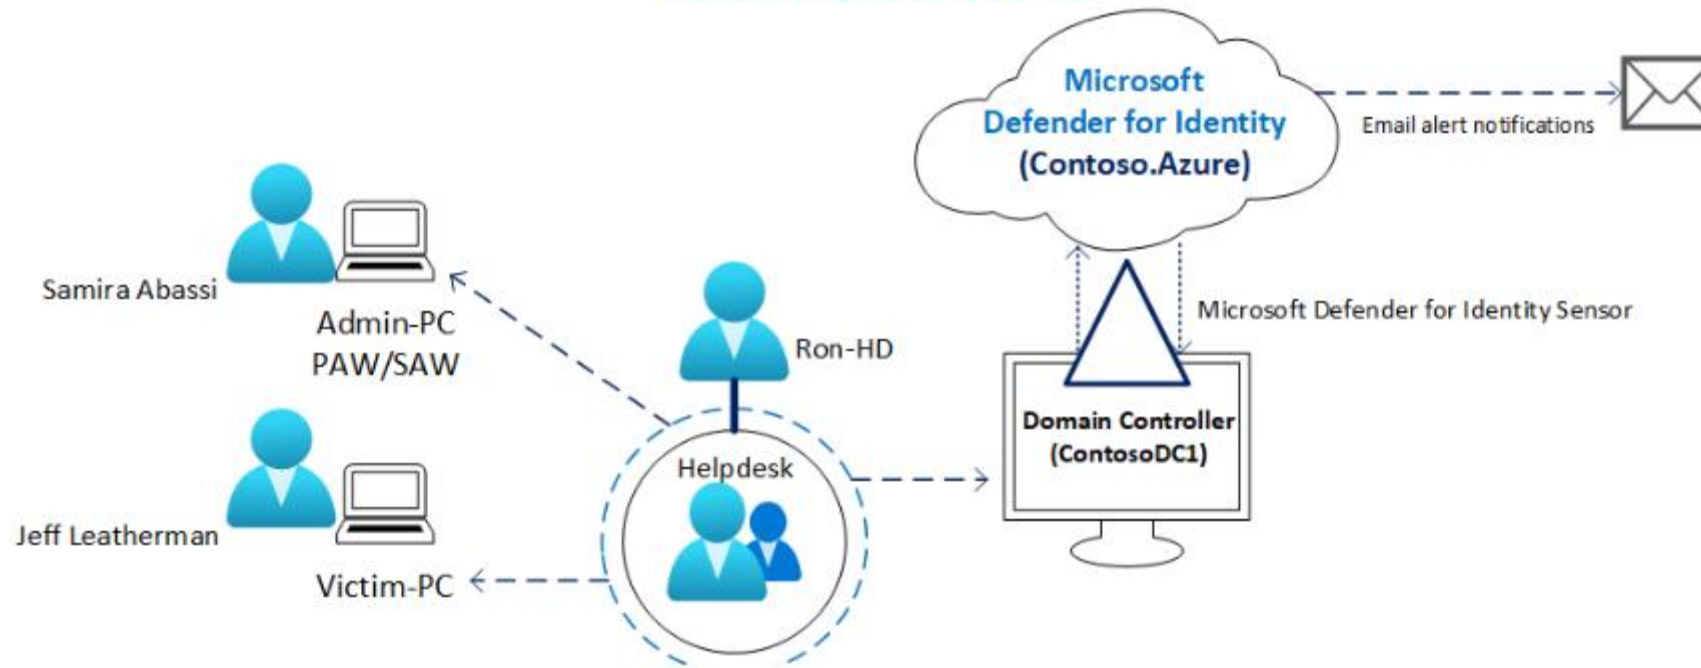

4

Monitoring and Support

Monitor and produce data risk analytics by content sensitivity, activity, and traffic. Define an Identity Security Operations plan for ongoing tuning and response workflows
