

INFORMATION AND CLOUD SECURITY

Microsoft Purview Insider Risk Quick Start

Identify emergent insider threats and behavior

As organizations continue to invest in Microsoft 365/Office 365 cloud platforms and managed infrastructure they do not control, it's critical to have capabilities in place to identify insider threats and emergent insider

Microsoft control frameworks present risk as it occurs, enabling you to detect, investigate, and mitigate actions for intentional or unintentional data loss events, data exfiltration, or other data loss scenarios. You need tools that alert, respond and investigate fast enough to prevent exfiltration or destruction of your mission-critical sensitive information. The tools to achieve this risk mitigation are the Insider Risk Management and Communications Compliance toolsets of Microsoft Purview.

Quick Start options and pricing

The Microsoft Purview Insider Risk Quick Start is a predictable and reliable program that allows you to immediately leverage your Microsoft investments. You'll receive high velocity, measurable outcomes and initial control frameworks for the data and identities inside M365 workloads — at a fixed price in a fixed time frame.

Basic

- Identify and record risky user behavior in the Microsoft 365 cloud
- Automatically trigger protections based on HR stressor events
- Identify compromised user identities
- Reduce false positives in DLP detection and enforcement
- Produce user risk analytics by identity, event, and content sensitivity

PRICING AND DURATION

Potential savings through Microsoft-funded incentives

Value-based deliverables

An analysis of user risk based on all available Microsoft 365

An ongoing Microsoft 365 Data Security Operations plan to support monitoring, tuning, trigger analysis, and response support workflows

An insider threat roadmap with recommendations for maintaining and improving risk posture and attack surface

2020

MICROSOFT SECURITY SYSTEM INTEGRATOR OF THE YEAR

Microsoft Partner of the Year 2021 Modernizing Applications 2020 Data Estate Modernization

Microsoft Advanced Specializations Identity and Access Management Information Protection and Governance Threat Protection
