Azure Customer Identity Quick Start

Workstream

Outcomes

1 **Discovery & Design**

Discovery and analysis of baseline requirements for Azure AD B2C. Develop an understanding of current client Customer Identity Access Management requirements

2 **Azure B2C Deployment, Configuration and Testing**

Delivery of an initial configuration in production of pre-built Azure B2C policies and configuration of out of the box UI personalization in the Azure B2C portal
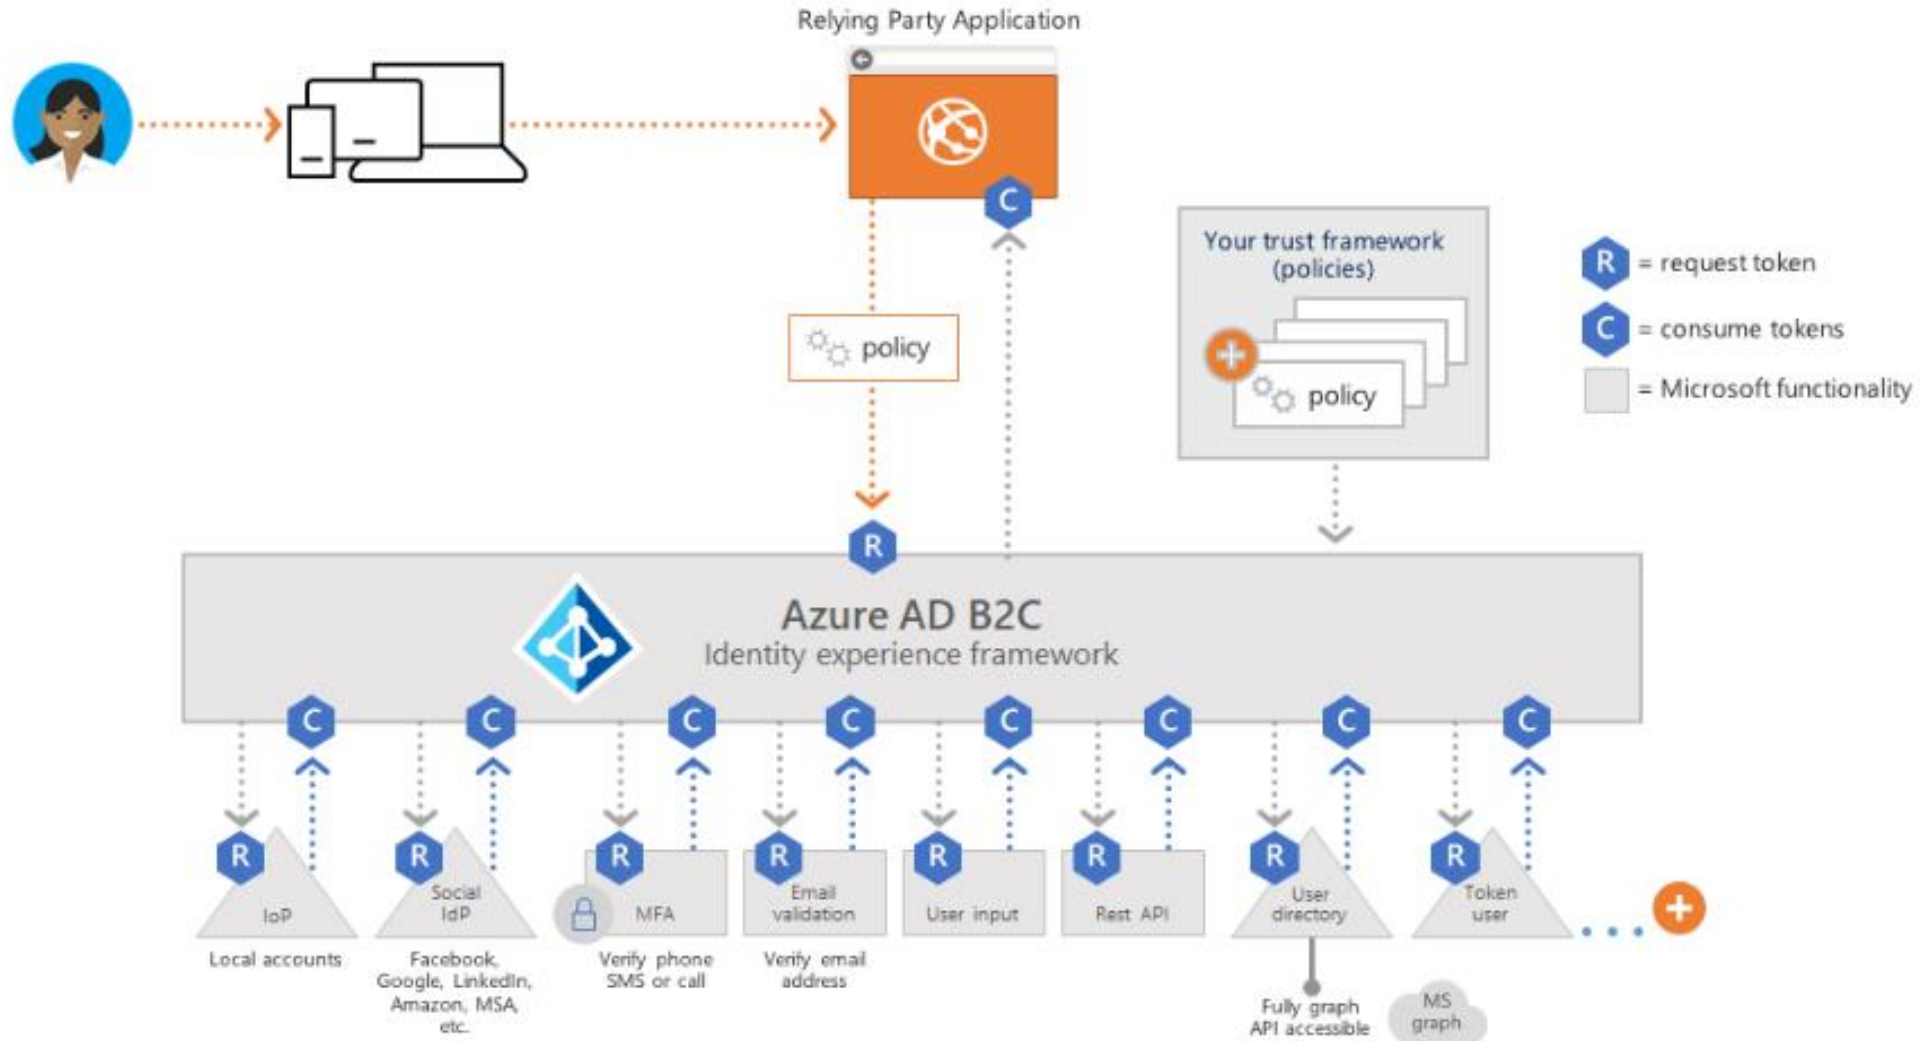

3 **DevOps Configuration and Deployment**

Delivery of an initial configuration of Azure DevOps to manage via pipelines the deployment of production B2C tenant.

4 **Monitoring and Support**

Monitor and assist personnel with user/system integration with the production cop of an application which will create identities as users interact with it
