ETHERINSIGHTS

Overview

EherInsights is an AI-powered cloud management solution for Microsoft 365 and Azure. It equips IT teams with real-time analytics and recommendations, helping reduce costs by up to 30% +, tracking carbon emissions and simplifying routine operations through intelligent automation. With its built-in virtual assistant, EtherInsights delivers actionable insights to optimise resources, improve efficiency and support sustainable, cost-effective cloud growth. Designed to scale with organisations of any size, it integrates seamlessly into your Microsoft environment, offering customisable reports and forecasting for informed decision making.

Cost Optimisation
Achieve notable cost reductions, trim wastage, and maximise value

Microsoft 365 Licence Usage
Analyse Licence distribution to optimize usage.

Sustainability Insights
Track Carbon Emissions linked to your carbon services.

User Activity
Gain Insights into usage trends and behaviour

Analytics & Reports
Generate and access in-depth analytics and reports

Windows 365 Utilisation
Monitor and assess virtual desktop performance.

Virtual Assistant
Get instant support from our AI-powered digital assistant.

Azure Orphaned Resources
Identify and remove unused Azure assets

Windows 11 Readiness
Review device compatibility.

Storage
Analyse OneDrive and Azure Blob usage to identify unused or oversized files, reduce costs, and optimise storage efficiency.

Pricing

EtherInsights offers flexible pricing with two options: a Campus Agreement at £3,500 per month for unlimited users, or £0.79 per month per active licensed Microsoft 365 user. Choose the model that best suits your organisation's size and needs.
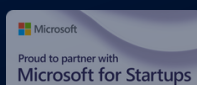

User Subscription
£0.79
Per Active user per month

Campus Agreement
£3500 per month
