

# EHC Professional Service.

Proven methodology to deploy Epic on cloud

## Phase 1

### Discovery & Advisory

- Epic technical discovery
- 3rd party dependencies
- Security assessment
- Architecture diagrams
- Remediation plan
- Detailed project plan
- Total Cost of Ownership

## Phase 2

### Cloud Foundation

- Landing zone buildout
- Networking setup
- Governance setup
- Monitoring setup
- Security setup
- FinOps
- Terraform development

## Phase 3

### Build Stamp

- IaaS deployment
- App Delivery
- ODB
- Cogito
- Client Systems
- Data protection buildout
- Well-architected review

## Phase 4

### Alternate & Production Stamp

- GENIO testing
- IRIS mirror testing
- Data protection buildout
- DR cutover
- Validation
- Well-architected review

## Phase 5

### Hypercare

- User acceptance
- Performance optimization
- Cost optimization
- Knowledge transfer
- Environment handover
- Troubleshooting
