Microsoft Dynamics 365 Business Central

Business Central for the Manufacturing Industry.

A complete solution to move your manufacturing into the future.

With Eide Bailly's experience in the manufacturing industry, we have identified ways to work harder, adapt faster and perform better with a complete industry-based solution.

Named one of the best Enterprise Resource Planning (ERP) systems by Forbes Advisor, Microsoft Dynamics 365 Business Central is a powerful, comprehensive business management solution for organizations of all sizes. With the extensive functionality of D365 BC and the vast library of Microsoft and 3rd party additions, it is perfect for your manufacturing organizations.

For small to midsize organizations seeking a powerful ERP solution with a fully defined Microsoft program, we've created our Dynamics 365 Business Central for the Manufacturing Industry program. This will assist you with not simply implementing a new ERP for your business.

Who We Are

Eide Bailly helps businesses work smarter — financially, operationally, and strategically. As a Top 20 CPA firm with clients in all 50 states, we bring practical expertise in tax, audit, advisory, and technology to improve performance, reduce risk, and support growth.

Is our manufacturing program right for you?

- You are looking for a complete vetted end-to-end solution.

- You are looking for a program that will not simply replace what you have been doing, but will take you to the next level of processing.

- You have high growth goals and target for the future.

- You want to work with people that know your business.

Implementation Process

Initiate
We start with a scheduled kick-off call with your team for introductions, process review, and expectation setting.

Plan
We'll work with you to finalize the project scope, timeline, and requirements for both our team and yours to stay on schedule.

Execute
Your core applications will be set up via hands-on system training. You will receive bi-weekly project updates to track progress.

Go-Live
From start to finish, our BC Jumpstart rapid implementation takes three months, on average. After go-live, we will provide you with support and assistance as your organization grows of your needs change.
