

How will CMMC Launchpad Services assist your business?

About Eide Bailly:

At Eide Bailly, we're more than just consultants; we're innovators and strategic partners dedicated to maximizing the potential of Microsoft to help support your CMMC journey. Our depth and breadth of technology experts, combined with deep industry knowledge in healthcare, manufacturing and distribution, financial institutions, non-profits, and public sector means that you will get expert guidance on responsible CMMC usage that brings you immediate business value.

What we offer

The CMMC Launchpad Services help organizations prepare for certification by identifying gaps in cybersecurity practices against CMMC requirements and guiding remediation efforts.

Using the same tools and methods as Certified CMMC Assessors (C3PAO's), we conduct interviews and documentation reviews to simulate the assessment experience and pinpoint areas needing improvement.

We then facilitate a workshop to develop tailored Plans of Action & Milestones (POA&M), providing a clear roadmap for remediation and compliance with CMMC Level 2 standards.

Next steps typically include scoping the environment that must meet CMMC requirements, such as identifying systems, users, and data flows, and implementing secure platforms like Microsoft Azure GCC High and M365 GCC High.

What our customers are saying

"Eide Bailly really raises the level of your technology and what you can do in your business."

– Robb Swanson, Operating Partner,
Zorbaz

Why Microsoft CMMC?

What's Included

- Discovery & Gap Assessment:
- Environment Scoping
- Plans of Action & Milestones:
- Creation of customized, audit-ready plans, policies, and procedures
- Remediation Support

Why CMMC Launchpad Services?

- Assessor-Aligned Approach: We use the same tools, templates, and methodology as Certified CMMC Assessors, ensuring your organization is evaluated and prepared in alignment with actual assessment standards.
- Certified CMMC Registered Provider Organization (RPO) by Cyber AB – the CMMC Accreditation Body.
- Strategic Scoping & Planning: We help define the systems, users, and data flows that fall within your CMMC boundary and guide implementation of secure platforms like Microsoft Azure GCC High and M365 GCC High.
