How will CMMC assist your business?

About Eide Bailly:

At Eide Bailly, we're more than just consultants; we're innovators and strategic partners dedicated to maximizing the potential of Microsoft to help support your CMMC journey. Our depth and breadth of technology experts, combined with deep industry knowledge in healthcare, manufacturing and distribution, financial institutions, non-profits, and public sector means that you will get expert guidance on responsible CMMC usage that brings you immediate business value.

What we offer

Eide Bailly's CMMC Ongoing Managed Services provide a secure enclave environment built to meet CMMC Level 2 standards. It includes separate user accounts, virtual workstations, secure email, and enforced MFA.

Our team handles network security, endpoint protection, and patching, while supporting Microsoft 365 Government tools like Teams and SharePoint. The enclave is powered by Microsoft Azure GCC-High, Entra ID, and other tools for added security.

Our Cybersecurity Services strengthen your overall security posture and support ongoing CMMC compliance. A dedicated Cybersecurity Advisor oversees monthly, quarterly, and annual tasks like patch management, access reviews, and response testing.

We deploy tools for password enforcement, EDR, application control, and emergency isolation. These services help protect against threats like ransomware and data theft while keeping your environment assessment-ready.

What our customers are saying

"Eide Bailly really raises the level of your technology and what you can do in your business."

– Robb Swanson, Operating Partner, Zorbaz
