

Business is moving, where you go is up to you.

How do you know when to invest in another server or explore your other options?

Our team has experience on both sides of the “on-premises vs. the cloud” debate. We can help you navigate the waters between how business was to where it’s going. Because the truth is: On-premises servers and systems are no longer your only option, but the cloud isn’t always the right move. Each has their place, and knowing which will be the most efficient, cost effective, and stable for you takes experience and expertise with both.

What We Do

Understand	We start by first understanding your business’s current and future needs, gaps, and goals.	Identify	We then find your best fit, whether it’s the cloud, on-premises, or a hybrid solution.	Implement	Next, we design and implement the best solution to tackle your immediate business needs.	Maintain	We then outline a plan to address your future needs and support your business with a long-term strategy.

Our Clients

“We don’t view our relationship with Eide Bailly as just a short-term deal. We have created a roadmap for a long-term success, which enables us to grow with an organization that knows us and understands our business.”

Tim Sanden, CIO of Cass County Electric

How We Modernize

Productivity	Platform	Intelligence
<ul style="list-style-type: none"> • Email & Communication • Collaboration Spaces • Document Management 	<ul style="list-style-type: none"> • Storage & Application Hosting • Identity & Device Management • Network Connectivity & Active Directory 	<ul style="list-style-type: none"> • Visual Reporting • Interactive Dashboards • Real-Time Analytics
