

Eide Bailly Alternative Cloud Storage

Why Alternative Cloud Storage?

As a consumer who continues to make the most out of your instance of NetSuite, running out of storage space becomes an impending issue. Should you exceed your storage allocation, you will be forced to upgrade your licensing to be compliant with your terms of agreement. In some cases, this can be double your existing licensing cost.

Eide Bailly's Alternative Cloud Storage solution helps with your storage needs and avoids costly licensing by providing a means to store your files elsewhere while still accessing them in NetSuite.

This solution enables you to control licensing costs and provides the flexibility to choose which cloud storage provider you use.

What Options Come with the Alternative Cloud Storage Solution?

Use your own storage - the Alternative Cloud Storage solution by Eide Bailly comes ready to work with the following providers:

What you gain when purchasing Eide Bailly's Alternative Cloud Storage solution

By purchasing the Eide Bailly Alternative Cloud Storage solution, you take control over your file cabinet space within Oracle NetSuite. Maintain your existing footprint and stay on top of your Oracle NetSuite storage allocation. You decide what files are offloaded from the file cabinet to a Cloud Storage provider of your choice. This ensures you're not forced into an expensive tier upgrade, and it provides visibility into the number of files and the overall amount of storage you have offloaded to your alternative cloud storage. With this solution, you can access the files from within NetSuite although they reside elsewhere. You are also purchasing a maintained/managed solution that adheres to Oracle NetSuite's BFN (Built for NetSuite) standards. This confirms your critical business processes won't stop working when the platform is upgraded twice annually.

What does the Alternative Cloud Storage Solution cost?

Eide Bailly charges for subscription-based use of the Alternative Cloud Storage solution. Please Contact Us for more detailed and updated information.
