QuickStart Implementation

Completed in 3 phases over 3 weeks:

Discover and Design

Rapid assessment of your requirements for Intune setup and mobile device / app management.

We **design MDM and MAM policies** based on gathered requirements to manage BYOD and company owned devices.

User guides and technical documentation are prepared specific to your organisation.

Implement MDM and MAM

Mobile Device Management and Mobile Application Management policies designed and implemented based on your organisation's requirements.

Policies enforce **enrollment of your company owned Apple iOS and Android devices** for device-level management.

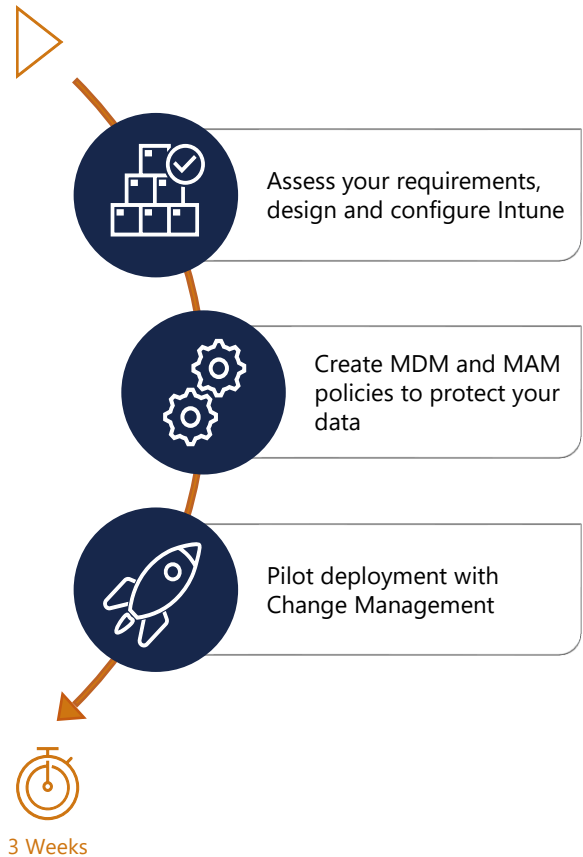

Apps are managed and secured before accessing corporate resources, **protecting your organisation's data** on BYOD devices.

Pilot Deployment

Pilot users are onboarded to Intune with MDM and MAM policies applied to their Apple iOS and Android devices.

Workshop and user guides accompany the pilot rollout to ensure a positive user experience.

Pilot user support is provided and solution is handed over to BAU support team **ready for rollout to your organisation..**
