About esharat

esharat connects different business sectors with their customers through smart notifications.

It is responsible for sending notifications to customers upon the occurrence of a certain event.

Our product supports multi-language messages (English, or Arabic) per event across various communication channels.

Esharat Offers A Range Of Creative Features Designed To Streamline Your Business.

Key Features

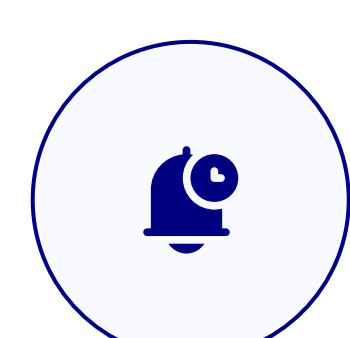

Multi-Channel & Language Support

The admin dashboard serves as your centralized control hub, offering a comprehensive overview of customer data.

Campaign/ Ad-hoc Notifications

The system is hosted on the cloud, providing the flexibility to access it securely from anywhere at any time.

Notification Management & Tracking

Reporting capabilities, allowing you to easily generate detailed reports on customer engagement.

Management Portal

Setting up the platform is quick and simple, designed with ease of use in mind. No complicated configurations are required.

Customer Management & Segmentation

The system allows you to create and personalize notification templates that can be tailored to specific communication needs.

Dashboard & Comprehensive Reporting

By grouping customers into segments, the platform enables you to target specific audiences with personalized messaging.

Benefits

Notification priority

Ensure that critical messages are delivered first by setting notification priorities. This feature allows businesses to manage the urgency of their communications.

Lower cost with diversity of pricing models

Benefit from cost-effective communication solutions tailored to your business needs with a variety of pricing models.

Compliant with security and encryption

Maintain the highest standards of security and data protection. This product complies with industry-leading security protocols and encryption methods.
