NEW: eKidz AI-Literacy Assistant (AILA)

eKidz merges AI empowered oral reading fluency analysis with a captivating library and reading activities, that students love. AILA marks a new generation of individualized, self-directed, and motivating reading experience. AILA is efficient and leads directly to accomplished reading comprehension from early on. And, what could foster reading motivation more than reading accomplishment?

- Records the student's reading
- Analyzes for accuracy, fluency, and prosody
- Provides immediate feedback to the student and the teacher
- Makes real-time practice suggestions
- Provides the tools for targeted reading exploration

AI analysis

Guided practice

- Comprehension
- Prosody
- Reading Fluency
- Reading Accuracy

eKidz Reader Scaffolding Features (RSF)

A scaffolded literacy support program works in sync with AILA. A variety of RSFs can be purposefully activated or deactivated. Specific RSF-combinations provide true support or challenges for individual learning preferences and needs. RSFs lead to reading success. But, most importantly, students love the fun and motivating RSFs. And, what could foster reading accomplishment more than reading motivation?

- Fiction and non-fiction texts on 12 staggered reading levels, that cover the K-5 performance spectrum
- Animated illustrations on every page, that clarify the content
- Read-aloud option with text highlighting, that model accuracy and prosody
- Recording and playback features, that help to reflect on one's performance
- Staggered questions and writing prompts, that help to practice close reading
- Flexible combination of all features, that meet the students' preferences and needs

On all operating systems: native app for iOS and Android; Web app on the browser.

# eKidz: THE UNIVERSAL READING & LANGUAGE APP

- ✓ for self-guided reading practice
- ✓ for literacy instruction
- ✓ for multiple language learners
- ✓ for interventions

eKidz AI for Skills and Strategies Training

eKidz automatically integrates all phases of the instructional spiral in one cohesive platform. eKidz' advanced AI-Literacy Assistant (AILA) technology regularly performs a formative oral reading analysis to determine the next steps in the literacy support program. Comprehension questions follow the guidelines of the PISA/PIRLS study. Teachers conveniently track individual or whole-class data and can assign special accommodations and/or challenges based on their personal knowledge of every student. eKidz is the ideal intervention tool for fluency and reading comprehension – in contrast to most other tools, that focus on foundational skills only.

The eKidz AILA-Spiral to Success:

1. Assessment → **2.** Goal setting → **3.** Assignment and Accommodations → **4.** Practice

For Classroom Instruction

The eKidz Reader Scaffolding Features (RSF) can be combined in countless ways, which allows for fun activities across all literacy standards and subject areas.

eKidz Instructional Possibilities:

Listening: drawing a graphic novel by listening only

Speaking: true storytelling to illustrations only

Writing: creative prompts like sequels or rewriting with character modifications

Accommodations: read-aloud for weak readers or text-only for strong readers

eKidz for Multiple Language Learners

eKidz is accessible in four languages:

English   Spanish   German   Ukrainian

eKidz along with AILA technology and all the wonderful RSFs is accessible in four languages. eKidz is as powerful in DL/I programs as in mainstream classrooms.

In addition, multilingual learners can enjoy eKidz at home in their native language. eKidz empowers multilingual learners to build biliteracy proficiency and to become confident readers and communicators in any language.

On all operating systems: native app for iOS and Android; Web app on the browser.
