

Intelligent All Mile Excellence Platform

As supply chains grow increasingly complex and customer expectations rise, businesses across eCommerce, qCommerce, and courier logistics face constant pressure to deliver excellence, while ensuring seamless customer satisfaction.

Key Challenges

- ⚙️ Scaling with precision
- 🚚 Right vehicle deployment
- 👥 Dynamic workforce management
- 👤 Elevating customer experience
- ⚠️ Mis-sort prevention
- 🕒 Avoiding delivery delays

Designed for businesses across industries, ElasticRun's All Mile Excellence Platform is a comprehensive, AI-powered SaaS platform that optimizes logistics at every stage of the supply chain—from the first mile to the middle mile and all the way to the last mile. With centralized intelligence, it transforms logistics from a cost center into a powerful growth engine.

Outcomes Delivered

99.96%

Autonomous shipment processing

20%

Increase in CSAT scores

8%

Reduction in fuel costs

20%

Increase in vehicle utilization

Technology,
Battle-Tested at Scale

97 Bn+ Checkpoints Generated
2 Bn+ Shipments Handled
\$180 Mn+ in Payments Processed
75 Mn+ Monthly Shipments
400 K+ Partners Onboarded

One Stop Solution

For all mile logistics excellence

Address AI Technology

Voice-assisted AI for intelligent shipment sorting. Experience up to 80% faster sorting and reduce mis-sort events by 70%

Risk Prevention Engine

Proactively safeguard shipments with advanced risk profiling and real-time interventions to prevent transportation risks

Automatic Assignment Engine

Streamline operations by delegating task assignments to AI, from pickup and delivery tasks to mid mile transport tasks, and more

Network Control Tower

Scale operations rapidly without compromising on quality

Ensure 99.96% autonomous shipment processing without manual interventions

Reduce Supervisory Overheads and scale with a lean team

Get notified only when intervention is necessary

Intelligent Vendor Management

Bid for short or long-term contracts, execute spot bidding, and select the best vendor for every task with AI

Risk-Free Transport

Ensure safe, compliant, and efficient transport with 10+ automated checks and real-time risk monitoring

Tracking and Visibility

Real-time shipment monitoring (App, GPS, Sim, and IOT based) with instant proof of delivery

Vehicle Capacity Planning

Maximize operational efficiency by deploying the right size and the right amount of vehicles for every transport requirement

Docking & Dispatch Planning

Automate and optimize docking schedules to ensure timely loading, unloading, and dispatching

Route Planning

Reduce costs and improve efficiency with route planning AI, ensuring optimal planning for every leg of the journey

About ElasticRun

ElasticRun is India's leading B2B ecommerce platform. ElasticRun's battle-tested technology powers India's largest sales and fulfillment network. It is also helping brands, shippers, and logistics service providers (LSPs) to digitally transform their operations through its robust SaaS platform.
