

AI-powered WMS

The rapid shift to eCommerce, qCommerce and omni-channel fulfillment is pushing brands, manufacturers, shippers and logistics service providers (LSPs) to digitally transform their networks. In doing so, businesses face the challenge of balancing rising customer expectations while driving revenue growth and minimizing costs.

Key Challenges

Locked-in working capital

Revenue loss from understocking

Inefficient order fulfillment

Expiry and damage losses

Suboptimal space and resource utilization

Designed for businesses across industries, ElasticRun's Integrated WMS is an AI-powered SaaS product designed to transform how warehouses operate. It optimizes inbound and outbound processes, seamlessly integrates with existing systems, and provides AI-powered centralized inventory management across multiple locations. The integrated WMS elevates operational efficiency, unlocks working capital and optimizes your warehouse operations to accelerate revenue growth.

Key Benefits

Unlock working capital

Enhanced fill rates

Increased operational efficiency

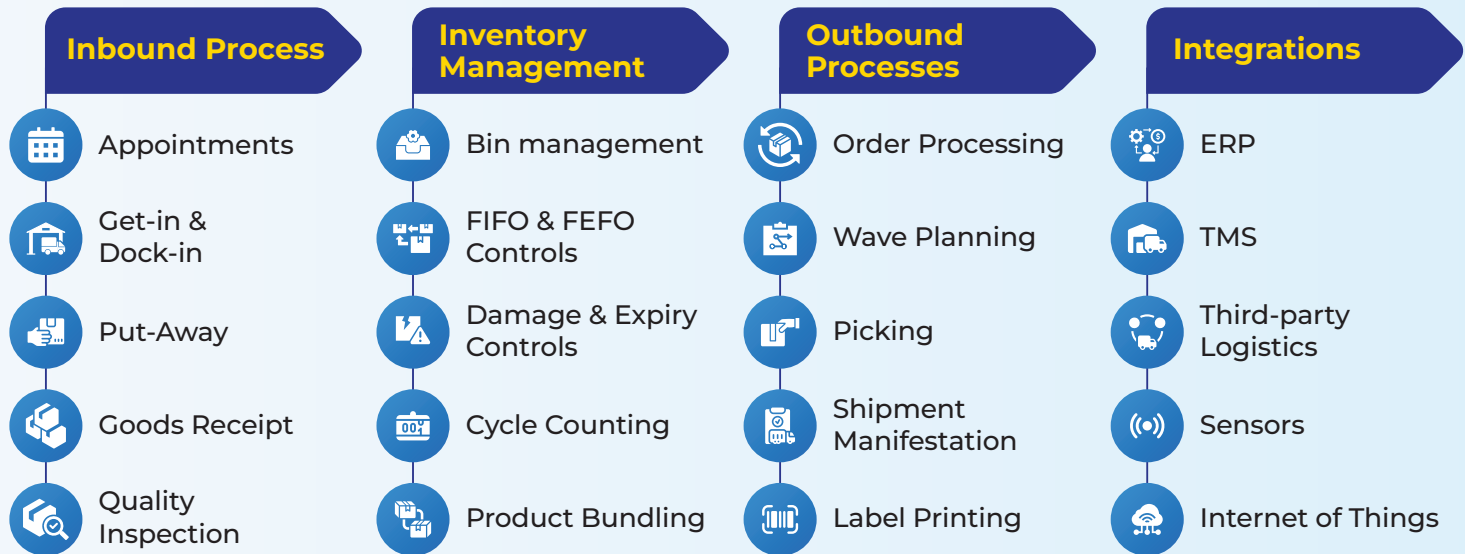

Predictive risk prevention

Leaner cost structure

One Stop Solution

For comprehensive warehouse operations

Unified Inventory Management

Seamlessly track, manage, and fulfill orders across multiple locations from one central platform

Inventory Optimizer

Optimize working capital and minimize loss by eliminating overstocking and stockouts

Inventory Insights

Unlock key business metrics such as damages, expiries & beyond with an advanced data lens overlaying your inventory data

Accurate Stock Control

Align physical and system stock with calendar-driven counting cycles, swiftly addressing discrepancies or damages

Replenishment AI

Automate replenishment based on reorder points or leverage AI-powered adjustments

AI-powered Fraud Prevention

Safeguard procurement and inventory risks with AI

Supercharge your Warehouse Operations

Accelerate turnaround times

Eliminate think time in decision-making

Eliminate operational bottlenecks with actionable insights

Prevent losses with real-time reconciliations

About ElasticRun

ElasticRun is India's leading B2B ecommerce platform. ElasticRun's battle-tested technology powers India's largest sales and fulfillment network. It is also helping brands, shippers, and logistics service providers (LSPs) to digitally transform their operations through its robust SaaS platform.
