

Unlock the Power of AI with Confidence:

SECURE AI

TRANSFORMATION WORKSHOP

Transform your organization's use of Microsoft Copilot with a focus on security and responsible AI.

Are you ready to take your integration of Microsoft Copilot to the next level, ensuring seamless implementation within a robust data governance and security framework? Our Secure AI and Copilot Transformation Workshop is the answer!

WORKSHOP FOCUS:

This one-day workshop, priced at \$4,000, is designed to provide your team with the knowledge and strategies needed to harness AI responsibly and securely within your organization.

Key Benefits:

Tailored Security

Learn to implement sensitivity labels and permissions aligned with your specific needs.

Data Loss Prevention

Develop an actionable DLP enforcement strategy and become familiar with compliance monitoring tools.

Optimized Collaboration

Maximize secure teamwork using SharePoint, OneDrive, and Teams.

Responsible AI Culture

Build a foundation for responsible AI practices, prioritizing data integrity and intellectual property rights.

Outcomes You Can Expect:

Actionable Roadmap

Leave with a clear action plan detailing your successful AI deployment and governance.

Compliance Confidence

Understand how to best use Copilot while safeguarding data privacy and adhering to regulations.

Best Practice Adoption

Integrate expert guidance on secure AI implementation, data sensitivity, and collaboration.

Empowered Team

Equip your workforce with the tools to maximize AI's potential, driving secure productivity and innovation.

TAKE THE NEXT STEP!

Book a call now to future-proof your digital workspace with our AI workshop—where innovation meets security. Start transforming your organization confidently.
