Compliance Automation Platform

Optimise costs by automating your information security governance activities (policies/controls design)

Enable comprehensive security and risk management monitoring

Improve the efficiency of the internal and external certification audits (ISO27002, SOC2, HITRUST)

Let technology coordinate all the compliance efforts within your organisation

Adopt automated compliance processes to establish a single pane of glass into all the regulations your business must follow daily.

€1.3 billion

In GDPR fines issued to date

eCAP is an advanced governance, **risk and compliance (GRC)** solution that enables centralised management of compliance-related activities across your organisation.

The platform produces reports that allow you to estimate the current level of compliance and identify potential areas for improvement. In addition, the platform will significantly speed up the implementation of new and updated legislation by generating an almost instant "map and gap" analysis.

The platform is specially developed with highly regulated industries in mind, allowing organisations in such domains as Finance, Healthcare and Insurance to comply efficiently with multiple frameworks, international standards and 3rd party requirements.

44%

of CEOs rank data privacy among the top three policies most impactful to their business

Source: **PwC**

THE PLATFORM HELPS YOU TO:

• Stay informed about regulatory updates and new revisions of information security standards;

• Automate the "map and gap" analysis for the existing and new requirements coming from legislation, international standards and 3rd party contracts;

• Automatically generate updates to internal policies and standards based on changes in requirements;

• Effectively manage multi-standard and location-specific compliance;

• Provide real-time reporting on the status of compliance with the possibility to break down to a specific regulation or selected business division/location;

• Decrease cost and improve the results of the certification audits (IS27001, SOC2, HiTrust);

• Decrease the total cost of compliance;

Visit our website for more info

HOW THE PLATFORM WORKS

1
Select the standards or regulations relevant to your organisation and define their applicability.

2
Create and update policies and controls based on the eCAP templates regarding the applicable requirements.

3
Connect data sources required to monitor the operational efficiency of the controls executed across your organisation.

4
Obtain a comprehensive real-time view of your organisation's compliance and automatically generate reports for internal and external audits.

ADDITIONAL HIGHLIGHTS:

COMPLIANCE NEWS FEED

eCAP applies machine learning to collect and categorise news so you can stay on top of the changes in the regulatory landscape.

EASY INTEGRATION

You can integrate eCAP into your ecosystem using Restful API's requests and system reports.

THIRD-PARTY COMPLIANCE

Use eCAP to demonstrate the security and compliance of your organisation to your clients. What's more, eCAP is a powerful tool for supply chain management monitoring.

DATA VISUALISATION AND REPORTING

All the data from the platform can be translated into convenient drill-down dashboards and customised reports benchmarked against KPIs, metrics, statistics, trends and more.

COMPLIANCE ALERTS

eCAP can be set up to generate alerts for the most critical events to help you ensure timely response and proactive remediation of issues.
