ELEKS
Data Science
Platform

Scalable. Flexible. Secure.

PROBLEM

Successful integration of AI and advanced analytics into the business model is a **complex**, **multi-step process** that requires considerable time, money and effort. This often delays deployment and leads to overspending — in both time and money — on simple tasks that could be automated.

A lot of **developers**, **DevOps** and **support engineers** are usually needed to handle the deployment, security, integration and maintenance of whichever data science model you have.

48%

of companies with a robust analytics culture significantly exceeded their business goals in the past 12 months

according to Deloitte's "2019 Becoming an Insight-Driven Organization" survey

SOLUTION

The ELEKS Data Science Platform has been developed to **take the pain out of machine learning model management**, allowing your team to create and manage models with ease. You're able to free up valuable internal resource to focus on the core business, **saving you time and money**.

This solution enables you to expand your analytics capabilities to drive efficiency and performance.

EDSP BENEFITS:

Project **costs slashed by up to 40%**, with significantly less spend on DevOps and development time.

High standard of security.

Significantly lower costs and model support complexity.

Ability to create machine learning models via AutoML – even with no prior data science expertise.

Reduced burden of operational tasks for your data scientists, allowing them to focus on your data.

Cloud-agnostic setup that **reduces the risk of vendor lock-in**.

Rapid failure detection with out-of-the-box monitoring.

Up to **2 times faster** delivery of data science projects.
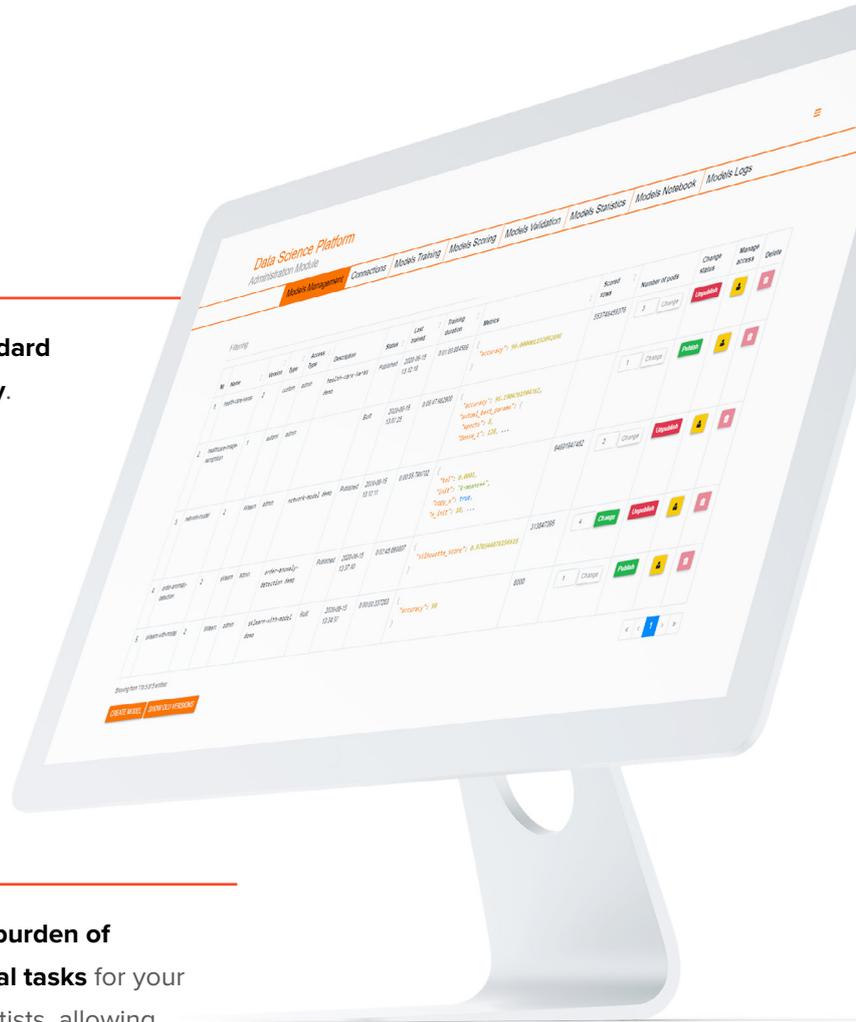

To realize the full potential of your data, book your free eDSP demo today.
