

Jumpstart your reporting environment using our Power BI "Out-of-the-Box"

ABOUT

Founded in 2007, element61 is the thought-leading Business Analytics, Performance Management and Data Science consulting company in the Belgian marketplace. Today, element61 has brought together the **most experienced team** in Analytics, Performance Management, Business Intelligence, Data Science, Data Governance and Big Data & Artificial intelligence in Belgium.

element61 helps companies define and execute Analytics & AI strategies and their individual milestones. Our projects deliver tangible business benefits and allow companies to better understand past and present performance and manage future performance.

See what customers are saying:

"The delivered BI environment gives us insights in ERP as well as CRM data. It helps us to exploit all potential within the data, allowing us to make decisions quickly and more effective. End users now have access to visual and interactive reporting dashboards which also can easily be shared among colleagues"

– Ingrid Ertryckx, IT Manager, Tribù

WHAT WE OFFER

BI "Out of the Box" is a pre-packaged Business Intelligence solution, which is **source-agnostic** and covering your most important figures, analysis, dashboards and reports using Power BI!

The solution includes a staging layer, ETL framework, predefined star schemes for the Data Warehouse and corresponding PowerBI semantic models. BI Data is available via both PowerBI and Excel and comes with standard dashboards.

- **Pre-Packaged Solution:** Covering the domains of Sales, CRM, Purchase, Finance, Inventory, Timesheets, Service and Production, for all sources.
- **Reduced Risk & self-service:** Open for customization, scalable and stable due to proven technology and best practices.
- **Agile:** Achieve insights on day one and enjoy fast improvement cycles.
- **Version Neutrality:** The solution can access and combine data from different source system versions and can deliver the Business Intelligence in SQL Server on premise or in the Azure Cloud.
- **No burden on IT:** IT keeps control of the backend, while your business users enjoy both enterprise and self-service BI.
- **BI for users:** Data becomes available in cubes (Analysis Services) for reporting (Reporting Services) and for self-service and mobile BI (Power BI)

Why “Out-of-the-Box”

Accelerate your insights

With our Out-of-the-Box Power BI solution, you can go from data ingestion to actionable dashboards in just **5–10 days**. The complete framework - from data analysis and modelling to serving and visualization - is already built and ready to deploy. This drastically reduces implementation time, allowing your team to start exploring insights and making data-driven decisions almost immediately, without the delays of traditional BI development.

One Single Source of Truth

Our solution provides **one enterprise data model** - pre-defined, standardized, and fully source-agnostic. This ensures that all business units work with consistent, validated data from a central repository. By integrating all sources into a unified model, our OOTB solution eliminates data silos and discrepancies, establishing a trusted foundation for reporting and analytics across the entire organization.

Self-Service & Cloud-ready

Empower your teams with **self-service analytics** built on the scalability and flexibility of the cloud. Users can easily access, explore, and visualize data without depending on IT or developers. With secure cloud infrastructure and intuitive Power BI interfaces, decision-makers gain the agility to monitor performance, uncover trends, and act on insights anytime, anywhere.

Future-proof Continuity

Our “Out-of-the-Box” solution is designed for **long-term scalability and seamless migration**. As your data landscape evolves — whether moving to new sources or upgrading systems — your core data model and reports remain intact. This ensures business continuity, reduces rework, and keeps your analytics environment ready for the future.
