elevaite
365 TEST AUTOMATION

MANUAL TESTING FATIGUE?

human error
typos, missed steps and overlooked bugs undetected issues arising from missing test areas can cause costly disruptions to normal business operations

time consuming
go-live dates can be significantly delayed when bugs are found as each test case is executed individually, and muliple times if a bug fix is required

scaling limitations
as Microsoft enforces updates and continually releases new versions with additional features, more test cases need to be created, executed and documented

42% of ERP implementation failures are attributed to inadequate testing

worldmetrics.org

Unless you enjoy dealing with operational headaches, thorough testing of Microsoft D365 implementations, upgrades and customizations before going live is critical.

elevaite365 Test Automation simplifies the testing process, making sure everything runs smoothly so you can avoid chaos and system downtime.

elevaite
365 TEST AUTOMATION

Refreshingly Different.

Alternative testing solutions are rigid and restrictive, often leaving their customers vulnerable to coverage gaps, undetected issues and increased testing costs as new features and integrations are added to your D365 Application.

elevaite365 Test Automation licenses are designed with the customer in mind - accessible pricing without cutting corners and freedom to test every nook and cranny.

unlimited executions	**unlimited scripts***	**unlimited instances**	**unlimited users**

* up to 50 scripts included per integration license
