

# Helping Companies with Technology Since 1985

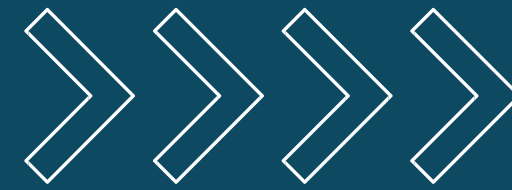

We help businesses use digital solutions to reduce operational problems and improve profitability by automating processes and increasing operational visibility.

**HACEB**  
SOLUTION PROVIDER

# About Haceb

# A Story About Excellence

More than 30 years of experience in implementing business solutions has helped us develop a method that streamlines the digital transformation process and maximizes business efficiencies.

We have implemented our diverse enterprise and business solutions in more than 13 countries, we are proud of customer satisfaction history and our success rate in implementing customized solutions. And we have helped many holding companies as well as large and medium-sized businesses meet their objectives.

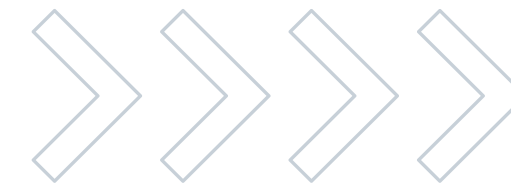

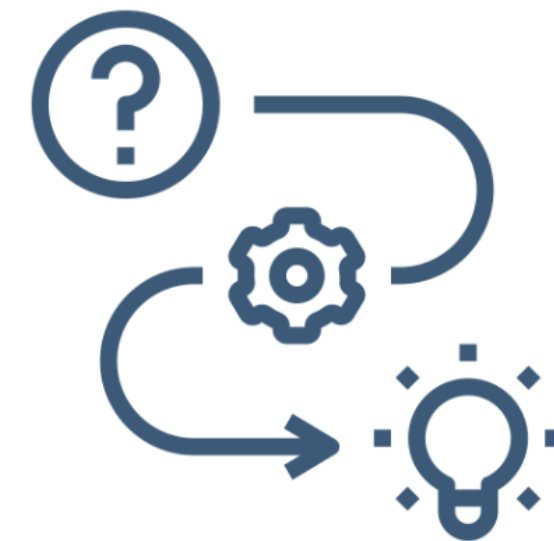

# A Team of Problem Solvers

Our leadership and senior management are based in Riyadh and are supported by our own in-house global certified tech team, professional services team, and business analysts specialized in digital transformation.

Our solutions are customized to be industry specific to meet your exact business requirements.

# The Haceb Methodology

## 1 • Consultation

Discover, Plan, Demonstrate, Execute, Optimize & Support

## 2 • Implementation

Implementation of your tailored ERP solution

## 5 • 24/7 Support

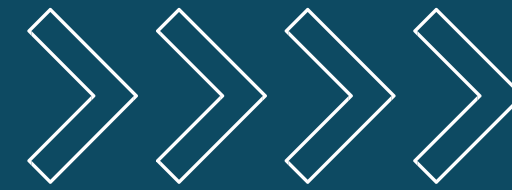

Ongoing 24/7 support as much or as little as you need

## 4 • Integration

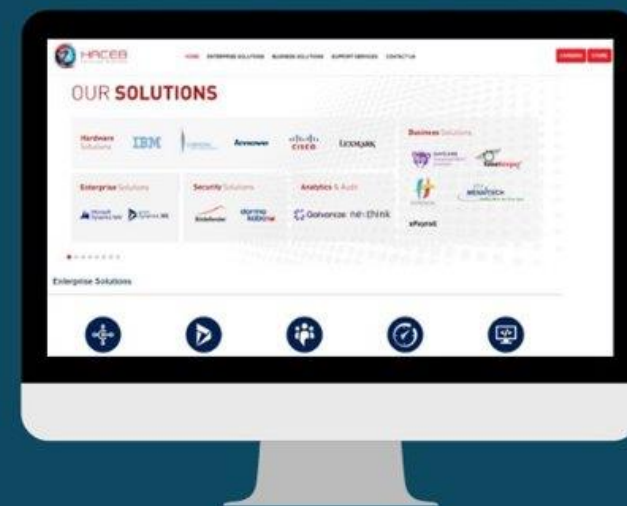

Seamless integration of your existing programs and software as required

## 3 • Migration

Careful migration of your existing data to the new system

# Industry Specific Solutions

## Business

## Key Features

## The Results

### Microsoft Power Platform

- Create and use custom business apps
- Connect to various data sources
- Build apps that automate processes
- Use AI and insights
- Power Apps work on any device
- Share your apps with others
- Supply, Planning and Availability

- Power Apps has three types of apps: canvas, model-driven, and portal
  - **Canvas apps:** design tool using drag-and-drop tools and formulas
  - **Model-driven:** let you define the data model and components using app designer
  - **Portal:** let you create websites that external users can access with a login

### Azure

- Azure services can be categorized as follow
- Infrastructure as a service (IaaS)
  - Platform as a service (PaaS)
  - Software as a service (SaaS)
  - Serverless

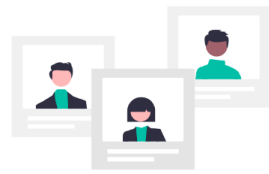

Power Apps is a cloud-based platform that allows you to create and use custom business apps without coding. You can connect to various data sources, such as Microsoft 365, Dynamics 365, SQL Server, SharePoint, and more, and build apps that automate processes and solve problems. You can also use AI and insights from Power BI, Microsoft Graph, and cognitive services to enhance your apps

### Microsoft collaboration

- Error free calculations
- Automatic tax updates
- Additional security
- Integrate data
- Regular reporting

- Easily import and export data
- Better decision making by utilizing reports
- Payroll confidentiality
- Error free payroll calculations
