Agenda

VIDEO (romanian language)

The implementation requirements of Microsoft Dynamics 365 Business Central solution

Iulian Motoi, CEO
ELIAN

Day 1

Project kick-off and system configuration.

Day 2

Creation of a company and financial setup.

Day 3

Training and go-live support.

What happens after implementing Microsoft Dynamics 365 Business Central solution?

Iulian Motoi, CEO
ELIAN

After three days of implementation you should be able to do key things such as:

- Manage your payables and receivables;
- Manage and reconcile your bank accounts;
- Manage inventory cost;
- Manage fixed assets;
- Close your income statement

All of these also can be at additional cost for multiple companies. Business Central supports inter-company transactions as well as consolidation, on the G/L account level for all of your companies, giving you the true picture of your finance.

Much more will be soon available at additional cost in the upcoming AppSource consulting services from our company.

The importance of the Project Manager in a Microsoft ERP implementation

Iulian Motoi, CEO
ELIAN

Onsite challenges in implementing Microsoft Dynamics 365 Business Central

Iulian Motoi, CEO
ELIAN

The successful implementation strategy of the project is based on some essential factors such as:

- ✚ A particularly effective communication /collaboration between Elian Solutions project teams and the beneficiary team.
- ✚ A good planning of the analysis activities so as not to affect the daily work of the beneficiary's experts who participate in defining the requirements for each functionality
- ✚ Active participation of users from the beneficiary in the presentation of prototypes, beta testing and final testing of the application
- ✚ An efficient exchange of data between the consultants of the beneficiary and the Elian Solutions team in the definition of functional requirements and computational algorithms
- ✚ A fast-decision-making process to ensure that solutions to problems arising during the project are agreed upon.

Project implementation is clearly defined in terms of time, resources, budget and deliverables across all project phases.

If you need an innovative partner and a modern and adaptable ERP solution, the ELIAN team is at your disposal!
