Nowadays, becoming data driven organisation seems the only way to accelerate the development of your company.

Our mission is to **make data usage your competitive advantage.**

We decided to introduce a solution that will leverage **Power BI, Azure Analytics, Azure Cognitive services** and **AI** functionalities to provide the users with a **trusted platform** that enables managing information from various sources of data.

Solution benefits

Users can view indicators, identify trends, review charts, maps and tables and browse and download analytical reports from the **AI-powered platform** for further analysis and use.

Smart Audit Platform is an analytics solution to ingest, store, analyze, explore, and visualize information.

Automation of data processing operations with improvement of data quality.

Modern, scalable user-friendly dashboards system.

Integration with critical systems (e. g. SAP).

Automation savings – cost reduction thanks to decrease of manual work.

Let's see what you can achieve thanks to **Elitmind Smart Audit Platform**:

Modern Data Platform supporting teams auditing big numbers of scanned documents.

Higher revenue due to fewer process gaps.

Fraud and anomaly detection.

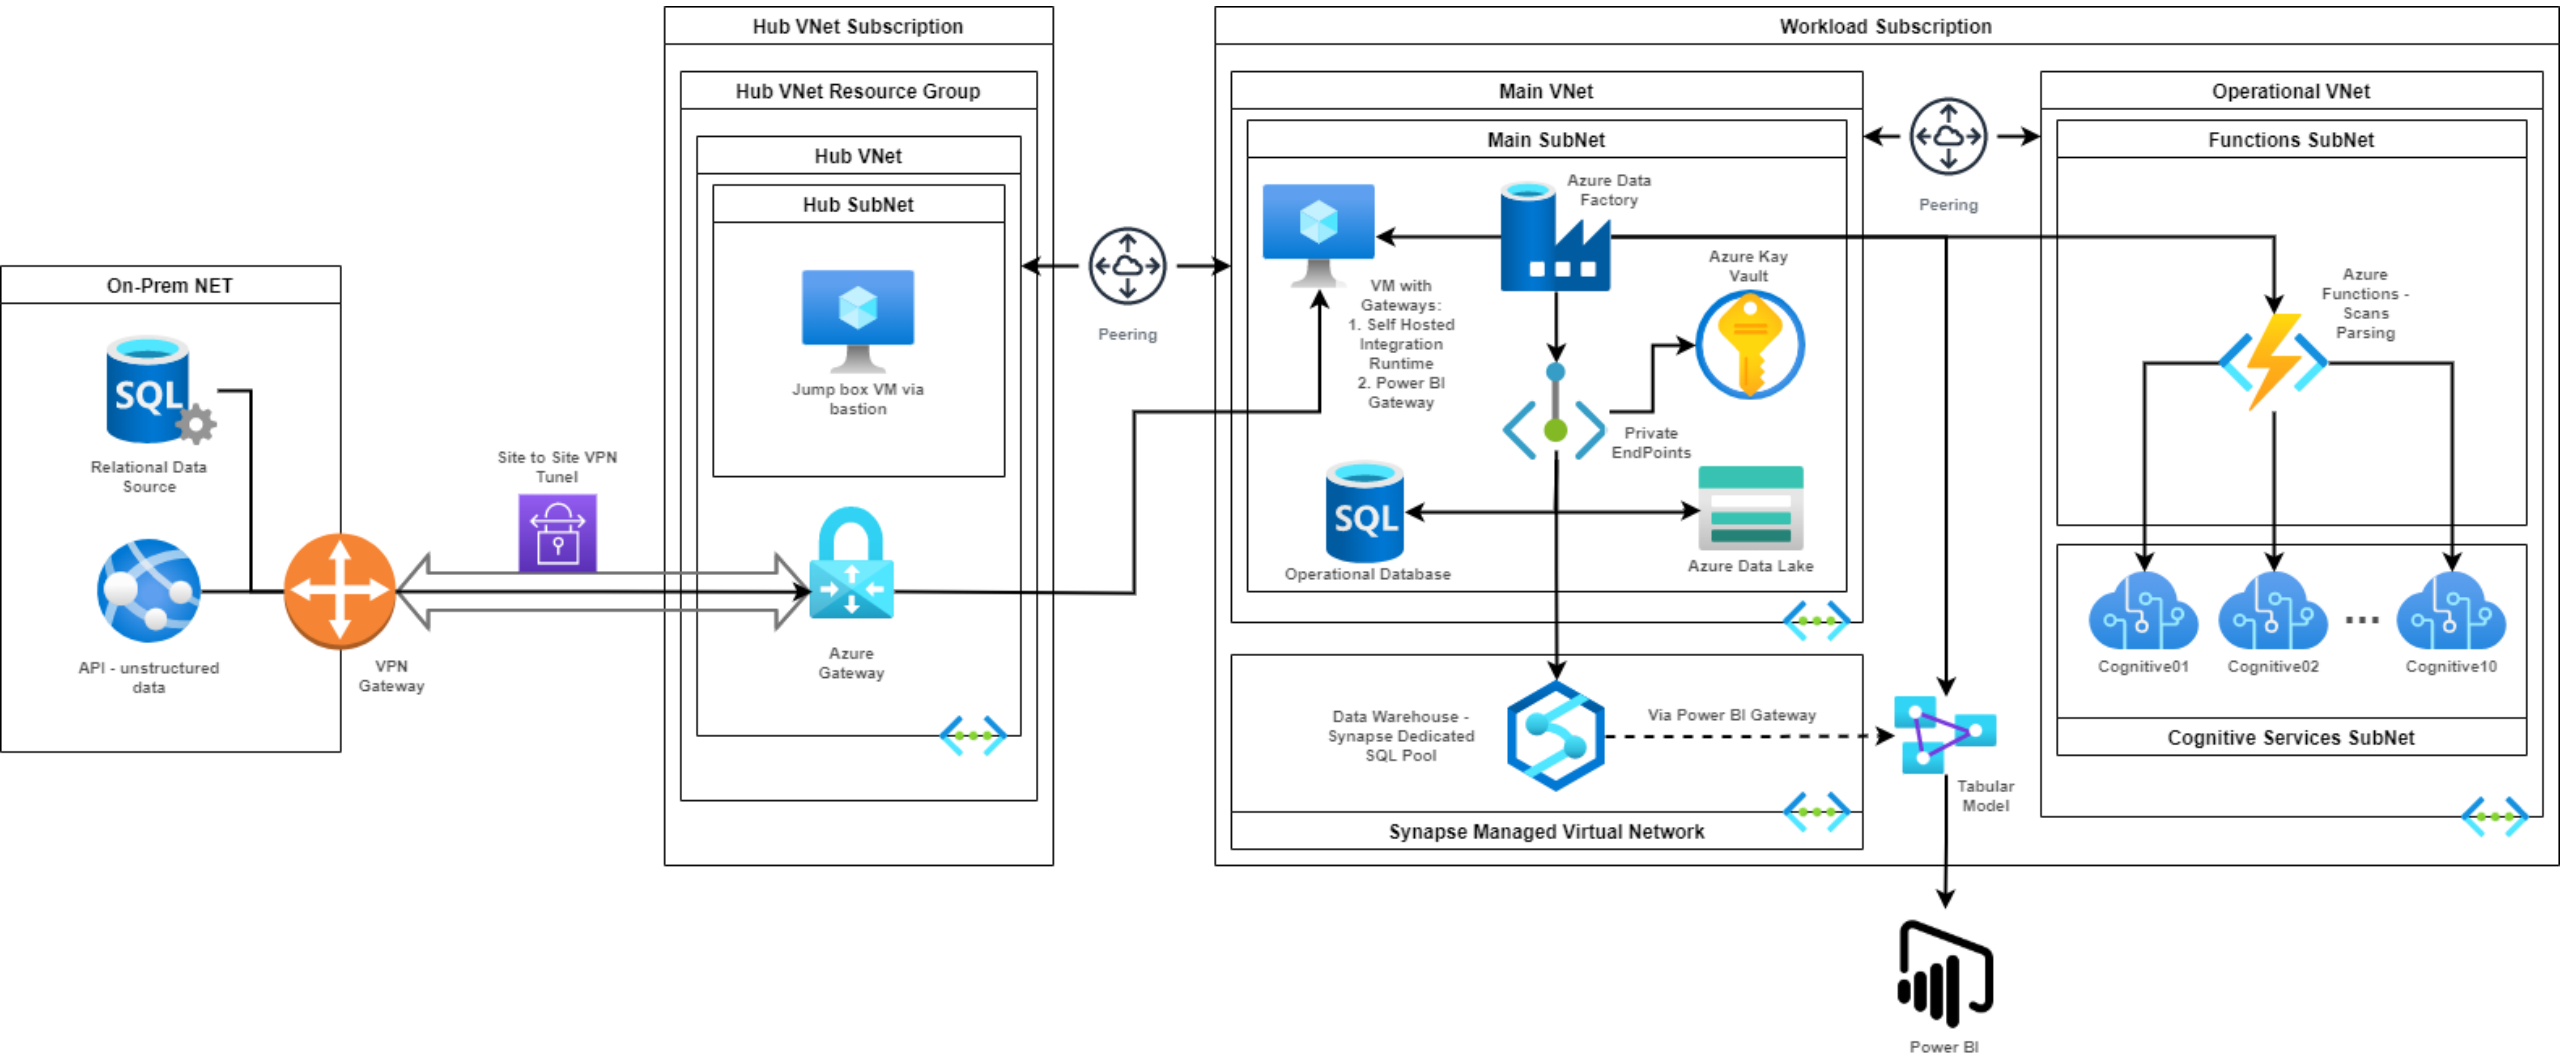

Electronic, paper documents and images advanced analytics.

High flexibility and integration with critical systems.

Efficient work with fully customized reports.
