500+
data products
Delivered with Ellipsis Drive

2500+
Users
Consuming spatial content via Ellipsis Drive

400+
Projects
Completed using Ellipsis Drive

OUR PURPOSE

We aim to make spatial data consumable for everyone

Empowering the industry and advancing your business goals

Enable data sharing and collaboration without limits
Never impose 'by seat' or 'by action' fees that make data sharing and using expensive.

Safeguard platform independence
Maximizing interoperability is at the center of what we do. That's how you stay relevant.

Introduce 'the Drive experience' to the spatial industry
Enable cloud activation, share your data in minutes, work together in real-time.

Create value for people with data worth sharing
Be the most value added place to activate spatial data that needs to be used.

15x
Faster onboarding
For vendors & partners

70%
Faster projects
Project completion for data scientists

10x
Faster data
For active querying and performance
