 JamAI Base

TRANSFORM YOUR BUSINESS

- ✦ Create Custom AI Workflows with Ease
- ✦ Deploy Generative AI solutions within hours
- ✦ Leverage Enterprise-Grade Generative AI Infrastructure
- ✦ Stay Ahead of the Competition

OVERCOME COMMON ENTERPRISE AI CHALLENGES

- ✦ Misalignment between domain experts and AI capabilities
- ✦ Long development cycles
- ✦ Lengthy time & high cost investment before seeing returns
- ✦ Potential for costly failures impacting business operations

WHY CHOOSE OUR INTEGRATED SOLUTION?

- ✦ Database with Generative AI
- ✦ Create AI workflows without coding
- ✦ Accelerate Implementation from months to days
- ✦ LLM Task Optimizer & Execution Engine
- ✦ State-of-the-art RAG implementation
- ✦ Seamless Integration with Existing Systems via API, SDK & Connectors

REVOLUTIONIZE YOUR ENTERPRISE AI

 JamAI Base  intel.  AMD

 NVIDIA.  PHISON

UNLOCK GENERATIVE AI POTENTIAL

WITH **JamAI Base**

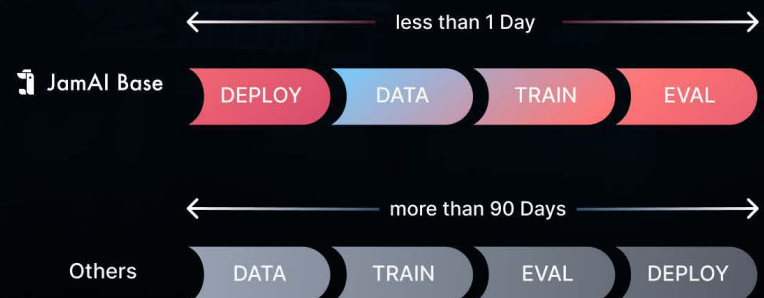

Only 13% of AI/ML Projects
made it into Production!

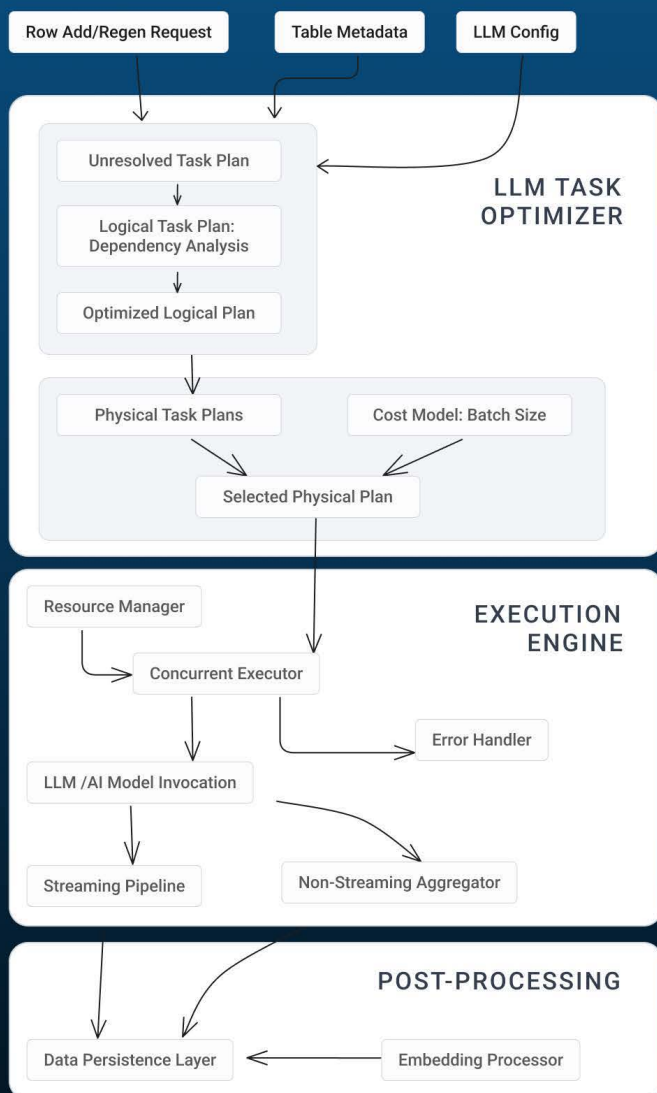

Only 45% of companies
deploy any AI/ML models!

- ✦ Deploy first strategy
- ✦ The infrastructure handle the fine tuning and MLOps for you
- ✦ Accelerate Implementation from months to hours

OUR INTEGRATED SOLUTION ✨

LLM TASK OPTIMIZER & EXECUTION ENGINE

Bank Risk Management

	ID	Updated at	Input	User	Output	AI

1	06617fd4-455c-7064-8000-c516adcb28a8	2024-02-27T11:29:39.448Z	Explain what is Gini scores.		Gini scores, in the context of banking and risk management, are measures of a model's predictive power. They are used to evaluate the performance of classification models, particularly in distinguishing between classes. In the provided documents, Gini scores are mentioned in the context of machine learning applications in risk management, such as...	
2	06617fd4-455c-7064-8000-c516adcb28a8	2024-02-27T11:29:39.448Z	What is BCBS 239?		BCBS 239 refers to the Principles for Effective Risk Data Aggregation and Risk Reporting issued by the Basel Committee on Banking Supervision (BCBS). These principles aim to ensure that banks have the ability to aggregate risk data and produce risk reports	

Prompt RAG Enabled

Output Summary

Customise prompt

You should give helpful, detailed, and polite answers to the human's questions.

System prompt

JamAI Base provides an intuitive spreadsheet UI, bridging the gap between domain experts & AI to easily build Generative AI workflow declaratively without code

EXAMPLE REAL WORLD USE CASES FOR ALL SECTORS:

HOSPITALITY & RESTAURANTS

- Personalized travel recommendations
- Automated booking and reservation systems
- Menu optimization based on customer preferences

BROADCASTING

- Automated content summarization and tagging
- Personalized content recommendations
- Real-time sentiment analysis of viewer feedback

INDUSTRIAL MANUFACTURING

- Quality control automation
- Supply chain optimization
- Predictive maintenance for machinery

EDUCATION

- Intelligent tutoring systems
- Automated grading and feedback
- Personalized learning path creation

RETAIL

- Personalized shopping experiences
- Inventory management optimization
- Customer service chatbots

ENERGY & UTILITIES

- Predictive maintenance for equipment
- Smart grid optimization
- Energy consumption forecasting

SMART CITIES

- Traffic flow optimization
- Urban planning assistance
- Environmental monitoring and analysis

FINANCIAL SERVICES

- Automated risk assessment
- Fraud detection and prevention
- Personalized financial advice

GOVERNMENT & PUBLIC SECTOR

- Citizen query resolution chatbots
- Policy impact analysis
- Automated document processing

HEALTH & LIFE SCIENCES

- Health risk predictions & assessment
- Patient data analysis for personalized treatment
- Preliminary diagnosis with doctors in the loop for new patients
