

Contract Management Application by Embee Software

AI-Powered Contract Intelligence for Faster, Smarter Decisions

The Contract Management Application is an AI-driven solution that reads, analyzes, and transforms contract documents into structured, actionable data. By automating contract ingestion and intelligence extraction, the application eliminates manual review efforts and enables better visibility, compliance, and risk management across the contract lifecycle.

Key Features of the Contract Management Application

 Automated ingestion of contract documents directly from SharePoint libraries

 Conversion of unstructured contract data into structured SharePoint lists

 Centralized contract visibility across departments and teams

 Seamless integration with Microsoft 365 and enterprise systems

 AI-based extraction of key contract information including clauses, dates, obligations, and risks

 Intelligent keyword and metadata tagging for faster contract search and discovery

 Proactive tracking of renewals, obligations, and risk indicators

 Secure role-based access for different operational and administrative users

Why Use the Contract Management Application?

- Reduce contract review time by 65–70% by eliminating manual data extraction
- Improve operational productivity by 45–55% through automation of contract intelligence
- Strengthen compliance tracking and audit readiness across contracts
- Enable proactive risk identification and governance
- Enable 55% faster audit preparation with structured and searchable contract data
- Minimize renewal and obligation leakage by 70–75% with proactive monitoring
- Gain faster access to critical contract insights for better decision-making
- Standardize contract intelligence and visibility across the organization
