Rapidly Remote by Embee

Access your Data Anywhere and Everywhere

Rapidly Remote for Digital Workspace

Improved planning & decision making - With ticket management, approval is readily available at your fingertips, to raise issue to admin or partner & monitor the same.

360 Degree view of Azure - Connecting Rapidly Remote with Power BI helps in decision making especially regarding security, optimisation and resource utilization.

Saves time - The power of DevOps & automation ensures customer environment is ready to be onboarded in a week with the best practices defined by Microsoft.

Improved communication - Chat with the managers & admins to follow up on any tickets or issues. Get instant clarification using monitoring dashboard created using log analytics and Power BI.

Instant information about anonymous activity - Monitor user login details to identify suspicious logins & potential brute force attacks and suspicious activities.

Improves discipline - Rapidly Remote can improve accuracy and build discipline within any team.

Integrate, Track, Monitor & Connect at one place

» No more toggling b/w different screens, AVD along with Teams got it all!

» Consolidated view to any configuration requisitions.

» Simple, clutter-free experience for easy tracking.

» Single place to connect, raise/approve requisitions.

» Single Place to monitor Azure using Power BI & log analytics.

» Security capabilities like FQDN filtering, vulnerability assessment with resolution steps & 24*7 data monitoring to combat data breach.
