

Embee's Well Architected Framework (WAF) Assessment

Our Presence

28 Years of Strong
Partnership with Microsoft

Head Office

Mumbai

Delivery Centers

Kolkata & New Delhi (NOC & SOC)

2500+

Customers

850+

Associates

500+

Certified &
Trained

**We ensure customer centric services by making with dedicated delivery/
technical teams across all the locations*

**10 locations
across India**

Embee at a Glance

Making IT Easier

With 35+ years of industry experience

Customer-centric

1200+ repeat customers with decades long relationships

PAN-India Network

With 10 locations around the country

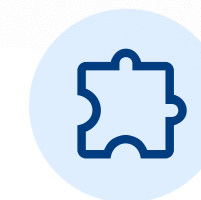

We are growing

Growing at 50% CAGR for last 2 years crossing USD 250M revenue by FY24, while our Services revenue is growing at 100% CAGR

Leading with Digital Transformation

With Deep expertise in Cloud, Data Analytics, Apps, Cybersecurity and AI/ML.

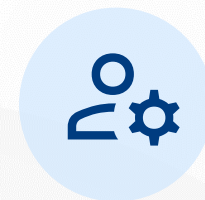

Go-to-Implementations Partner

1000+ successful on-time, on-budget project implementations in last 3 years

Dedicated Workforce

850+ strong team devoted to customer success

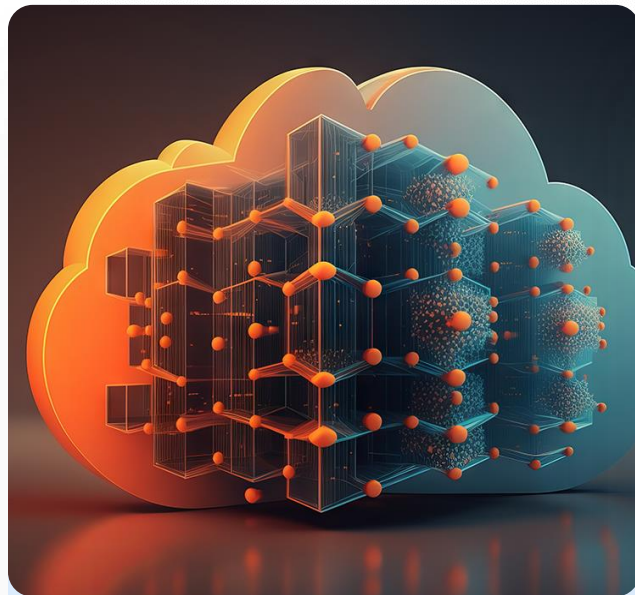

24x7 Managed Services

Proactive monitoring and support to deliver 'Zero downtime' and relieve your IT headache

One of the Largest LSP in India

Our Solutions for Modern Enterprises

Azure Solutions

Tailored cloud solutions that align with your business objectives, improving efficiency and scalability.

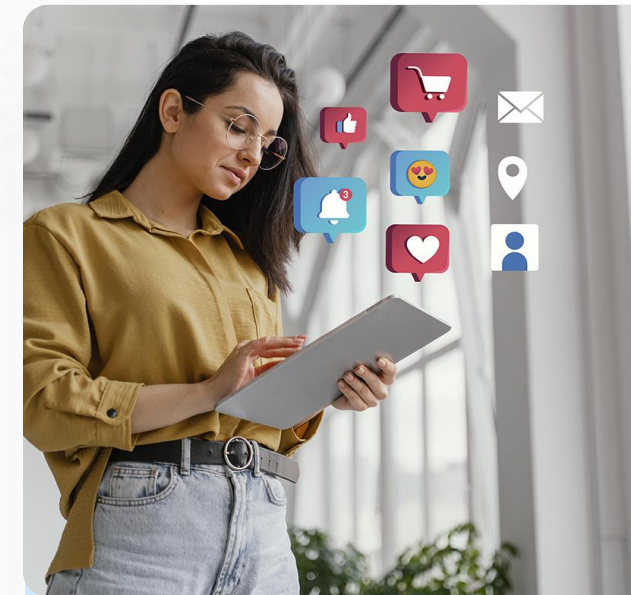

Modern Workplace

We enable modern workplace transformation, leveraging cloud technology for enhanced collaboration and productivity.

24*7 Managed Services

We provide round-the-clock managed services to ensure smooth and uninterrupted cloud operations.

Business Applications

We design and develop high-performing applications optimized for cloud, driving business transformation.

Cybersecurity

We prioritize security in every aspect of our cloud services, ensuring your data and applications are always protected.

Embee's Services Portfolio for Azure

Azure Infra

Consulting, Landing Zone
Design Assessments

(Cloud readiness WAF/ CAF, FinOps),

Migrations to Azure Cloud/ AVS

Migration of VMs to AKS

Homogeneous Database
Migrations

DRaaS/ DR on Azure
Hybrid Cloud with Azure Arc

Azure Virtual Desktop

Digital App Innovation

Lift & Optimize, Legacy App
Modernization, Re-platform

Cloud Native App development

Build AI Infused Apps

DevOps & GitHub on Azure

Services for GitHub Copilot &
Custom Copilots

Heterogeneous DB Migrations

Data & AI

Data Estate Migration,
Modernization

Build Data Warehouse & Big
Data Platform

Creation of Data Models &
Advanced Analytics

Azure AI and Azure Open AI

Custom Chatbots & Industry
Solutions

Copilot Plugins & Extendibility

Security

Security Consulting, Assessment &
Audit Services

Modern Threat Protection with
Defender XDR

Implementation of Security
Copilot

Modern SecOps with Azure
Sentinel

Identity & Access with Microsoft
Entra ID

Managed Hybrid SOC

Well Architected Framework Assessment-Approach

Initial Assessment

- **Objective:** To understand the current state of your cloud environment, including needs and challenges.
- **Activities:** Engage with stakeholders to gather information on existing workloads and desired outcomes.

Workload Identification

- **Objective:** Select specific workloads for review based on business priorities.
- **Activities:** Identify applications or services that will be assessed against the framework..

In-depth Architectural Review

- **Objective:** Conduct a comprehensive evaluation of the identified workloads.
- **Activities:** Use the Azure Well-Architected Tool to assess compliance with the five pillars.

Identification of Risks and Opportunities

- **Objective:** Pinpoint strengths, weaknesses, and areas for improvement.
- **Activities:** Analyze findings to develop actionable recommendations for optimization..

Reporting and Recommendations

- **Objective:** Provide a detailed report summarizing the review findings.
- **Activities:** Present a prioritized roadmap with specific steps for enhancing cloud architecture based on the assessment results

Outcomes

Enhanced Reliability

Increased Security

Cost Optimization

Performance Efficiency

Operational Excellence

Well Architected Framework Review Outcomes

Actionable Recommendations

The review generates tailored and prioritized recommendations based on responses to a series of assessment questions

Improved Workload Performance

Optimize workloads for better efficiency and productivity, ensuring that their cloud resources are utilized effectively to meet business needs

Enhanced Security Posture

Provides insights into security vulnerabilities and offers guidance on implementing robust security measures, thereby reducing risks associated with data breaches and compliance issues

Cost Savings

Helps organizations manage their cloud spending more effectively, leading to significant savings over time

Increased Reliability

Helps in gaining clarity on their existing cloud environments and can implement strategies that enhance the reliability of their applications, ensuring they remain available and performant under various conditions

Operational Excellence

Promotes best practices in operations management, allowing organizations to streamline processes and improve overall operational efficiency

Performance Insights

Detailed feedback on performance metrics, enabling them to make informed decisions about scaling and optimizing their applications for better user experiences

Roadmap for Continuous Improvement

A comprehensive report that outlines a prioritized roadmap for ongoing improvements, ensuring that organizations can adapt their cloud strategies as business needs evolve
